 - [1.4 Example](#)

Description

Deletes a customer profile and all its extension records and identifications keys records.

Important

Starting with the 8.5.0 release, service, state, and task data are no longer handled in UCS and therefore will not be deleted.

Operation

ID	CV.WS.PROF.8		
Method	DELETE		
URI	/profiles/\${customer_id}		
Parameter	Type	Mandatory	Description
\${customer_id}	string	yes	The unique ID of the given customer that is specified in the URI.

<references />

Response

The Context Management Service API answers with HTTP codes for every request. The following tables show the correct response for a successful request, and the response if the customer cannot be deleted. See [HTTP Response Codes and Errors](#) for further details on the possible codes that this operation can return.

Response

HTTP code	200
HTTP message	Success

Response

HTTP code	404
HTTP message	Not Found

Example

Operation The following operation deletes a particular customer:

```
DELETE /profiles/0004Va58A92T0018
```

Result

200 Success
