Query Services

Modified in 8.5.111

- GET /genesys/1/cs/services/anonymous/\${contact key}
- GET /genesys/1/cs/customers/\${customer id}/services

Description

The operations on this page allow users to query for active and/or completed services, either for a specific customer or for anonymous services matching a contact key. The latter case primarily addresses service resumption use cases for services in which the customer is not yet identified. For example, consider the following:

- The customer calls in from phone number 408-832-7799.
- The application starts a service, noting contact key "408-832-7799" for further reference.
- The application is not able to identify the caller based on the phone number.
- IVR identifies that the customer is calling to set up a new wireless account.
- The customer is placed in an agent queue. After 10 minutes, the call is dropped.
- The customer calls back in from the same number. The application still cannot identify the customer based on that number.
- The application looks up whether there are any outstanding services with identification token "408-832-7799"--one is returned.
- The application asks the customer whether he or she is calling back in regards to the previous request or for a new wireless request. Upon confirmation, the customer is placed back in the agent queue.

Operations

Query Anonymous Services

Important

This operation queries anonymous services only.

ID	CV.WS.SRV.10		
Method	GET		
URI	 Active: /genesys/1/cs/services/anonymous/\${contact_key}/active Completed: /genesys/1/cs/services/ anonymous/\${contact_key}/completed All: /genesys/1/cs/services/anonymous/\${contact_key} 		
Field Name	Туре	Mandatory	Description
URI Parameters	71	,	
\${contact_key}	string	yes	The "contact key" is supplied at the service creation if the service is started before the customer's identification. This key can be used to look up the service with this method, or for further association once the customer is identified (see Associate Service).
started_from	date/time	no	Filters the services started on or after the given date/time given in ISO 8601 representation: [YYYY] - [MM] - [DD]T[HH]: [mm]: [ss]. [SSS]Z
started_to	date/time	no	Filters the services started prior to the given date/time in ISO 8601 representation: [YYYY]-[MM]- [DD]T[HH]:[mm]:[ss].[SSS]Z.
completed_from	date/time	no	Filters the services that were completed on or after the given date/ time in ISO 8601 representation: [YYYY] - [MM] - [DD]T[HH] : [mm] : [ss] . [SSS]Z. Only applicable when querying service history.
completed_to	date/time	no	Filters the services completed prior to the given date/time. Only applicable when querying service history.

ID	CV.WS.SRV.10		
			Date given in ISO 8601 representation: [YYYY]-[MM]-[DD]T[HH]:[mm]:[ss].[SSS]Z
service_types	integer	no	Filters the services by the application-defined service type. Refer to Configuration Options for more details on Business Attribute mapping. Your application can specify several types separated by a comma, as follows: service_types=1,3,45
active_states	bool	no	 "true" to include information on the service's active states in the results. "false" by default.
active_tasks	bool	no	 "true" to include information on the service's active tasks in the results. "false" (default).
completed_states	bool	no	 "true" to include information on the service's completed states in the results. "false" (default).
completed_tasks	bool	no	 "true" to include information on the service's completed tasks in the results. "false" (default).
max_services Added in: 8.5.111	integer	no	Maximum number of services to return.
<extension key=""></extension>	Any JSON type	no	Service attached data as key-value pairs. You can add as many key-value pairs as needed.

Query Customer Services

Important

This operation queries services which are not anonymous, that is, services which are associated with a customer id.

ID	CV.WS.SRV.10		
Method	GET		
URIs	 Active Services: /genesys/1/cs/customers/\${customer_id}/services/active Completed Services: /genesys/1/cs/customers/\${customer_id}/services/completed All Services: /genesys/1/cs/customers/\${customer_id}/services 		
Parameter	Туре	Mandatory	Description
URI Parameters			
\${customer_id}	string	yes	The Customer ID, to get associated active or completed services. Note that a customer can be associated with a service either at the service creation or later in the process (see Associate Service).
started_from	date/time	no	Filters the services started on or after the given date/time in ISO 8601 representation: [YYYY]-[MM]- [DD]T[HH]:[mm]:[ss].[SSS]Z
started_to	date/time	no	Filters the services started prior to the given date/time in SO 8601 representation: [YYYY]-[MM]- [DD]T[HH]:[mm]:[ss].[SSS]Z
completed_from	date/time	no	Filters the services that were completed on or after the given date/ time in ISO 8601 representation: [YYYY]-[MM]- [DD]T[HH]:[mm]:[ss].[SSS]Z.

ID	CV.WS.SRV.10		
			Only applicable when querying service history.
completed_to	date/time	no	Filters the services completed prior to the given date/time. Only applicable when querying service history.
service_types	long or string	no	Filters the services by the application-defined service type. Refer to Configuration Options for more details on Business Attribute mapping.
active_states	bool	no	 "true" to include information on the service's active states in the results. "false" by default.
active_tasks	bool	no	 "true" to include information on the service's active tasks in the results. "false" (default).
completed_states	bool	no	 "true" to include information on the service's completed states in the results. "false" (default).
completed_tasks	bool	no	 "true" to include information on the service's completed tasks in the results. "false" (default).
max_services Added in: 8.5.111	integer	no	Maximum number of services to return.
<extension key=""></extension>	Any JSON type	no	Service attached data as key-value pairs. You can add as many key-

ID	CV.WS.SRV.10	
		value pairs as needed.

Response

The Context Management Service API answers with HTTP codes for every request. The following table shows the correct response for a successful request. See HTTP Response Codes and Errors for further details on the possible codes that this operation can return.

Response

HTTP code	200
HTTP message	OK
Body	Service[].

Example

Operation

GET /genesys/1/cs/customers/ABC1234/services/active?active_states=true

Response

Important

In the above example, the inline State objects do not include active/completed tasks.
