## API Reference

Service Resources

# Service Resources

Groups the Service resources.

- **End Event List:** List of the end events that your application can receive if a service, state, or task is terminated.
- **Extension:** JSON extension for the service API.
- **State Transition Event:** Your application can receive this event if a service performs a transition between two states.
- **Service:** The service resource, which is a container for nested states and tasks.
- **State:** The state resource.
- **Start Event List:** List of the start events that your application can receive if a service, state, or task is started.
- **Task:** The task resource.
