# Schedules

## Important

The content of this document has been moved and is no longer being updated in this location.  
For the latest content and most recent updates, see the [CX Contact Help](#) on the Genesys Multicloud site.

CX Contact (CXC) **Schedules** is a powerful tool that enables you to execute one or more Campaign Groups automatically and periodically using a predefined schedule. Each Schedule can include one or more Campaign Groups that are not necessarily associated with the same campaign, group and so on. Multiple schedules can be configured and active in the same Outbound Contact Server (OCS) instance.

Schedules simplifies configuration by enabling you to define the activation and deactivation time for all the Campaign Groups that operate frequently and have recurring usage (for example, every weekday at 8 am).

While numerous Campaign Groups can be configured to be active/inactive at the same time, each Campaign Group within the schedule can be individually configured for activation/deactivation.

## Important

In the future CX Contact will include Sequence Campaign Groups that support Time in State and Statistical Value. With these conditions you will be able to define that when one campaign group achieves a 90% penetration status Campaign Group 2 begins.

## Key Features

- Schedule a Campaign Group to start/finish.
- Schedule a Campaign Group to run for a specified period of time or until a specific statistic is achieved.
- Sequence Campaign Groups. For example, it can be defined that when one campaign group achieves a 90% penetration status Campaign Group 2 begins.

## Work with Schedules

- [Create or Edit a Schedule](#) - Learn how to setup and organize when one or more Campaign Groups begin and end.
- [Schedules Dashboard](#) - View the activity history associated with one or more Campaign Groups.

### Important

You can access and customize near-real time reporting data about Schedules from the [Schedules Dashboard](#).

Click the **Schedules** menu to open the **Schedules** page. The following image depicts a typical Schedules page.
