[Composer Installation Video](#)

# Composer Installation Video

## Video Tutorial

Below is a video tutorial on installing Composer 8.1.3 on Windows in an [Eclipse 4.2](#) environment. When Eclipse 3.7 is installed, there is a small extra step described in the Installation chapter of the [Composer 8.1.3 Deployment Guide](#). Also see the [Deploying Composer](#) topic.

Notes:

1. This video is a high-level tutorial on Composer 8.1.3 installation. Be sure to consult the Composer 8.1.3 Deployment Guide *after watching this video*.
2. Silent installation of Composer is not supported.
3. Download the correct Eclipse for your computer's processor, i.e., download 64-bit Eclipse download or 32-bit Eclipse based on the target computer.
4. Java Development Kit and Eclipse must match, i.e., both 32-bit or both 64-bit.
