## Composer Help

[File Menu](#)

# File Menu

The commands active in the File menu change depending on the object you have selected, the perspective, and where you are within the perspective. Commands available from the File menu are described below. Also see the [Hiding File Types](#) topic.

<p>New (Alt+Shift+N)</p>	<p>Select <b>New &gt; Other</b>, which can be a new:</p> <ul style="list-style-type: none"> <li>• Java Composer Project</li> <li>• .NET Composer Project</li> <li>• Project</li> <li>• Callflow Diagram</li> <li>• Workflow Diagram</li> <li>• Grammar builder file</li> <li>• VoiceXML file</li> <li>• SCXML file</li> <li>• GrammarXML file</li> <li>• CallControlXML file</li> <li>• Backend JSP file</li> <li>• Folder</li> <li>• File</li> </ul> <p>You can also select Example... or Other... (for example, to create a new Interaction Process Diagram). Both of these bring up the Select a Wizard dialog box.</p>
<p>Open File</p>	<p>Opens the selected object.</p>
<p>Close (Ctrl+W)</p>	<p>Closes the current callflow or workflow diagram in the canvas.</p>
<p>Close All (Ctrl+Shift+W)</p>	<p>Closes all open elements in the workbench area.</p>
<p>Save (Ctrl+S)</p>	<p>Saves the selected object.</p>
<p>Save As</p>	<p>Saves the selected object under another name</p>
<p>Save All (Ctrl+Shift+S)</p>	<p>Saves all files in all open editors.</p>
<p>Revert</p>	<p>Reverts to an earlier saved version of a file</p>

---

	selected from the History.
Move	Moves Project resources.
Rename	Renames Project resources.
Refresh	Reloads the configuration.
Convert Line Delimiters To	Converts line delimiters within the callflow design canvas to one of the following: <ul style="list-style-type: none"><li>• Windows (default)</li><li>• Unix</li><li>• MacOS 9</li></ul>
Print	Prints the selected object(s) within the callflow design canvas
Page Setup	Brings up a dialog box where you can specify to use workplace settings or diagram settings. You can also change orientation, units, size, and the margin as well as configure workplace settings.
Print Preview	Previews the output before printing.
Switch Workspace...	Browses for/selects a different workspace storage area. Changes the set of projects and resources that you are working on.
Restart	Restarts Composer.
Import	Brings up a wizard that leads you through the process of importing various types of files.  Expand Composer to import from the file systems, such as an IRD strategy or a Realtime Debugger Launch Configuration.
Export	Brings up a wizard that leads you through the process of exporting various types of files.
Properties	Shows properties for the selected resource (such as a Project). When a Project is selected, includes the Deployment property.
Exit	Exits Composer.
