Log Common Block

Contents

- 1 Log Common Block
 - 1.1 Name Property
 - 1.2 Block Notes Property
 - 1.3 Exceptions Property
 - 1.4 Condition Property
 - 1.5 Label Property
 - 1.6 Logging Details Property
 - 1.7 Log Level Property
 - 1.8 Enable Status Property
 - 1.9 ORS Extensions Property

Composer Help 2

Use a Log block to record information about an application. For example, you can log caller-recorded input collected while an application is running or error messages. You can use the Log block for any of the following purposes:

- 1. Informational To log the application specific data
- 2. Error for logging error details
- 3. Warning to flag any warnings
- 4. Debug for debugging

The categories in the Log Level property correspond to the above.

When used for a callflow, the Log block writes the log to the Genesys Voice Platform logs (Media Control Platform) using the VoiceXML <log> tag.

The Log block has the following properties:

The Log block has no page exceptions.

Name Property

Find this property's details under Common Properties for Callflow Blocks or Common Properties for Workflow blocks.

Block Notes Property

Find this property's details under Common Properties for Callflow Blocks or Common Properties for Workflow Blocks.

Exceptions Property

Find this property's details under Common Properties for Callflow Blocks or Common Properties for Workflow Blocks.

For callflows, invalid ECMAScript expressions may raise the following exception events: error.semantic. For workflows, invalid ECMAScript expressions may raise the following exception events:

- error.log.ReferenceError
- error.illegalcond.SyntaxError
- error.illegalcond.ReferenceError

You can use custom events to define the ECMAScript exception event handling.

Composer Help 3

Condition Property

Find this property's details under Common Properties for Callflow Blocks or Common Properties for Workflow Blocks.

Label Property

This property applies to workflows only. It provides meta-data for the logging details.

Logging Details Property

Find this property's details under Common Properties for Callflow Blocks or Common Properties for Workflow Blocks.

Log Level Property

Find this property's details under Common Properties for Callflow Blocks or Common Properties for Workflow Blocks.

Enable Status Property

Find this property's details under Common Properties for Callflow Blocks or Common Properties for Workflow Blocks.

ORS Extensions Property

Starting with 8.1.4, Composer blocks used to build routing applications (with the exception of the Disconnect and EndParallel blocks) add a new ORS Extensions property.
