# eServices Deployment Guide

Connections Table

5/2/2025

# Connections Table

The following table lists connections that you set in the Configuration Layer for eServices components. eServices 8.1 supports **Transport Layer Security (TLS)** and **client-side port** functionality for some connections.

In addition to the information in the table, keep in mind that:

- Connections to Message Server are required only if you are planning to use it for application log output.
- A Local Control Agent (LCA) runs on each host. All Genesys components on a host connect to the local LCA. Refer to the **Framework Deployment Guide** for details on configuring LCAs.
- For Reporting purposes, you must also add a connection from your Reporting Stat Server to Interaction Server (or to Interaction Server Proxy).

## Important

It is possible to have **multiple connections** to some components. In the table, these components are marked with a \*.

Application	Connects to
Chat Server	Interaction Server Message Server Universal Contact Server
Classification Server	Message Server Universal Contact Server
E-mail Server	Interaction Server Message Server Universal Contact Server
Interaction Server	Chat Server (via the ESP port)* Classification Server* E-mail Server* Interaction Server DAP* Message Server Digital Messaging Server/Social Messaging Server Stat Server (for reporting)* (see Tip below) Universal Contact Server* Application Cluster*
Knowledge Manager	Universal Contact Server
Digital Messaging Server/Social Messaging Server	Message Server Chat Server* Interaction Server Solution Control Server

## Connections Table

---

Application	Connects to
	Universal Contact Server (Optional, depending on configuration)
Training Server	Message Server Universal Contact Server
Universal Contact Server	Message Server Stat Server* UCS DAPs
Universal Contact Manager	Universal Contact Server
Web API Server	Not included in release 8.5.0

### Tip

When Stat Server is configured in Hot Standby mode, Interaction Server must have connections to both Primary and Backup Stat Servers
