Configurations Options Reference Manual

Local Control Agent Configuration Options

5/4/2025

Local Control Agent Configuration Options

This chapter describes the configuration options for Local Control Agent (LCA) and includes the following sections:

- Setting Configuration Options
- Mandatory Options
- [general] Section
- [lca] Section
- [log] Section
- [security] Section
- LCA Configuration File
- Configuring ADDP Between LCA and Solution Control Server
- Changes in 8.5.x

Setting Configuration Options

You change default LCA configuration options in the configuration file **lca.cfg**. See LCA Configuration File for more information.

> ### Warning
> Configuration section names, configuration option names, and predefined option values are case-sensitive. Type them in the configuration file exactly as they are documented in this chapter.

Mandatory Options

You do not have to configure any options to start LCA.
