Configurations Options Reference Manual

[license] Section

5/9/2025

[license] Section

You must configure the License section for Solution Control Server when you use the following functionality:

- Redundant configurations—either `warm standby` or `hot standby`—for any Genesys server that the Management Layer controls.

- SCS support for geographically distributed configuration environments.

- Simple Network Management Protocol (SNMP) interface.

This section must be called **license**.

The only configuration option in the License section is called **license-file**, and this is the Genesys unified licensing option. Refer to the *Genesys Licensing Guide* for the option description and values.
