Configurations Options Reference Manual

Configuration Server Proxy Configuration Options

5/3/2025

Configuration Server Proxy Configuration Options

This chapter describes configuration options for Configuration Server operating in Proxy mode (referred to as Configuration Server Proxy) and includes the following sections:

- [Setting Configuration Options](#)
- [Mandatory Options](#)
- [\[license\] Section](#)
- [\[csproxy\] Section](#)
- [\[system\] Section](#)
- [\[history-log\] Section](#)
- [Application Parameter Options](#)
- [Changes in 8.5.x](#)

Configuration Server Proxy also supports the common options described in the [Common Configuration Options](#) chapter.

Setting Configuration Options

Unless specified otherwise, set the Configuration Server Proxy configuration options in the options of the Configuration Server Proxy Application object, using the following navigation path:

- Configuration Server Proxy Application object > Options tab > Advanced View (Options)

Important

Configuration section names, configuration option names, and predefined option values are case-sensitive. Type them in Genesys Administrator exactly as they are documented in this chapter.

Mandatory Options

The following table lists the Configuration Server Proxy options for which you must provide values;

otherwise, Configuration Server Proxy will not start. The options are listed by section.

Option Name	Default Value	Details
[license] Section		
license-file	No default value	This is the unified Genesys licensing option. See the description in the <i>Genesys Licensing Guide</i> .

Important

For information about starting and configuring Configuration Server Proxy, refer to the *Framework Deployment Guide*.
