Configurations Options Reference Manual

[snmp-v3-auth] Section

[snmp-v3-auth] Section

This section contains options used to mask and encrypt the SNMPv3 user password used for authentication. Refer to the *Genesys Security Deployment Guide* for information about this feature.

This section must be called **snmp-v3-auth**.

password

Default Value: No default value

Valid Value: A valid password

Changes Take Effect: After restart

The user password for authentication in the SNMPv3 system. This option causes the SNMPv3 password to be masked in Genesys Administrator to prevent others from seeing what is being typed. This option also causes Configuration Server to encrypt the password when storing it in the Configuration Database.

Important

Do not use this option and the **v3auth_password** option in the same SNMP Master Agent.
