SIP Feature Server Administration Guide

Remove Metadata of Expired Voicemail Messages

5/5/2025

Remove Metadata of Expired Voicemail Messages

Feature Server release 8.1.201.88 includes the following python script:

- **removeExpiredMessages.py**—Removes expired messages.

You can run this python script on the master Feature Server instance to remove metadata of expired voicemail messages.

See [Python Scripts](#) for information on how to deploy and run the **removeExpiredMessages.py** script.

Remove metadata of expired voicemail messages

1. Ensure that all Feature Servers are up and running.
2. Run `removeExpiredMessages.py`.

Run as a scheduled task

If you are using Feature Server version 8.1.202.00 or above then you can schedule the delete-expired-messages task as described in the [Scheduled maintenance tasks](#) page.
