Deploying Solution Definitions

4/12/2025

Deploying Solution Definitions

Deploying a solution installs and configures the solution at a local or remote location, as directed by the solution definition.

Deploying a Solution Definition File

1. In the **Solution Definition List** screen, select the solution definition file that you want to deploy.
2. In the **Properties** area that is displayed to the right of the **Solution Definition List**, click **Deploy**.
3. Follow the steps in the **Deployment Wizard**.

Important

The **Deploy Profile** type varies, depending on the profile specified in the solution definition file. For example, if `profile name="upgrade"` is present, a **Deploy Profile: upgrade** button displays.
