# Distributing Parameter Group Templates

## Deploying Parameter Group Templates

The Service Provider deploys Parameter Group Templates to tenants. At this point, the Parameter Group Template becomes a Parameter Group and is associated with a Routing Strategy.

1. In the header, go to **Operations > Operational Parameters > Group Templates**.
2. On the **Parameter Group Template List** panel, select the Parameter Group Template that you want to deploy.
3. On the **<Parameter Group Template name>** panel that is displayed to the right of the **Parameter Group Template List** panel, click **Deploy**.
4. In the **Parameter Group Deployment** panel, provide the following information:
  - a. **Parameter Group Name** — The name that is assigned to this Parameter Group.
  - b. **Tenant** — The tenant to which this Parameter Group belongs.
  - c. **Application** — The Routing Strategy that will be used by this tenant and is associated with this Parameter Group. Click **Search** to select from a list of Routing Strategies.
5. Click **Next**.
6. In the **Tenant** panel, select the name of the tenant(s) to which you want to deploy the Parameter Group.
7. Click **Next**.
8. In the **Parameter Group Deployment** panel, specify the application(s) that you want to enable on this parameter group by clicking **Add**.
9. In the **Designated Applications** panel, select the name of the application(s) that you want to add.
10. Click **Next**.
11. Preview the deployment in the **Summary**. If you are satisfied with the deployment, click **Finish**. To make changes, click **Previous**.
12. Click **Close**.

### Important

You can **modify** a Parameter Group Template after it has been deployed. For example, you can add, remove, re-order, and/or modify the parameters in an already deployed Parameter Group Template. Once saved, you can synchronize the changes and all Parameter Groups of the Parameter Group Template will be updated to the current structure.
