# Viewing the History of Solution Definition Files

Solution packages might change over time. They might be upgraded (up-versioned) to include both minor and major changes in the solution definition. New solutions might be added, removed, or retired. Genesys Administrator Extension enables you to generate reports to track these changes.

## Generating a Report on the Solution

1. Select a solution from the **Deployed Solution List**.
2. Click **History**. The **History** panel is displayed to the right of the **Deployed Solutions List**. You can filter reports by one or more of the following criteria: **Time**, **User**, **Tenant**, and **Change**.
