Genesys Administrator Extension Help

Solution Deployment

12/20/2025

Solution Deployment

Solution Deployment enables the user to fully deploy **solution definitions** and **installation packages** (IPs) to local and remote locations. This includes installation and configuration of all necessary applications and updates to existing multi-tenant applications, where appropriate.

A **solution definition** consists of an XML file that dictates the steps to install, upgrade, or configure **IPs** and system configurations to deploy a solution successfully.

Solution Deployment includes the following sections:

Installation Packages

These pages explain how to manage installation packages (IPs).

Installation packages

Upload, copy, deploy, download, or delete IPs

Use the **Deployment Wizard**

View Deployed IPs

Solution Definitions

These pages explain how to manage solution definitions.

Solution definitions and prerequisites

Create, delete, copy, modify, deploy, or export solution definitions

View **history** and list of **deployed solutions**

Privileges

This page explains how to manage privileges.
