Accessible Objects

# Accessible Objects

## Setting Accessible Objects

To see the objects to which a user account has access, perform the following actions:

1. In the header, go to **Accounts > System > User Accounts**.
2. In the **User Accounts** panel, click the name of a user account. A new panel opens to the right.
3. Click the **Accessible Objects** button. The **Accessible Objects** panel opens to the right.
4. Click the drop-down menu at the top of the **Accessible Objects** panel to view the object types to which the user account has access. Selecting an object type refreshes the list to display only the objects that are related to the object type. See [Access Control](#) for more information about the **Accessible Objects** panel.
