[Objective Tables](#)

12/18/2025

Objective Tables

Objective Tables are collections of Objective Records that define the correspondence between interaction attributes (such as media type, service type, and customer segment) and service objectives.

If you are using Cost-Based Routing, use a Cost Contract. A Cost Contract is a special type of Objective Table, and contains the information required for calculating the cost of an interaction to be routed. Cost Contracts contain Objective Records, each of which is associated with an IT Contract. For information about working with Cost Contracts, see the Cost Contracts section in the Procedures tab, below.

Refer to the [Universal Routing 8.0 Routing Application Configuration Guide](#) for more information about Objective Tables.

Display Options

Display Options

The Objective Tables list shows the Objective Tables that are in your environment. It is sorted in a hierarchy by Tenants, configuration units, sites, and folders. To view objects by a particular hierarchy, select the hierarchy type in the drop-down menu above the list.

Important

Objective Tables that are disabled appear grayed out in the list.

Configuration Manager respects tenancy permission settings. You can access only those objects that you have been granted permissions and privileges to access.

You can filter the contents of this list in two ways:

- Type the name or partial name of an object in the Quick Filter field.
- Click the magnifying glass button to open the Tenant Directory filter panel. In this panel, click the Tenant that you want to select. Use the Quick Filter field in this panel to filter the Tenant list.

You can sort the items in the list by clicking a column head. Clicking a column head a second time reverses the sort order. You can add or remove columns by clicking the Select Columns button.

To select or de-select multiple objects at once, click the Select button.

Procedures

Possible Procedures from this Panel

To **create a new Objective Table object**, click the New button. To view or edit details of an existing object, click on the name of the object, or click the check box beside an object and click the Edit button.

To delete one or more objects, click the check box beside the object(s) in the list and click the Delete button. You can also delete individual objects by clicking on the object and then clicking the Delete button.

Otherwise, click the More button to perform the following tasks:

- Clone—Copy an Objective Table.
- Move To—Move an Objective Table to another **hierarchical structure**.
- Enable or disable Objective Tables.
- Create a folder, configuration unit, or site. See **Object Hierarchy** for more information.

Click on the name of an Objective Table to view additional information about the object. You can also set **options** and **permissions**, and view **dependencies**.

Creating Objective Table Objects

To create an Objective Table object, choose one of the following types:

- **Objective Table**
- **Cost Contract**

Objective Table

1. Go to Configuration > System > Configuration Manager.
2. Click Objective Tables. The Objective Tables list displays.
3. Click the New button.
4. Enter the following information. For some fields, you can either enter the name of a value or click the Browse button to select a value from a list:
 - Name—The name of the Objective Table. You must specify a value for this property, and that value must be unique within the Configuration Database (in an enterprise environment) or the Tenant (in a multi-tenant environment).
 - Description—A brief description of the Objective Table.
 - Type—Select default to create an Objective Table that is not a Cost Contract
 - Tenant—In a multi-Tenant environment, the Tenant to which this object belongs. This value is

automatically set to the Tenant that was specified in the Tenant Directory field in the object list.

- **State Enabled**—If selected, indicates that the object is in regular operating condition and can be used without any restrictions.

5. Click the Save button.

Cost Contract

1. Go to Configuration > System > Configuration Manager.
2. Click Objective Tables. The Objective Tables list displays.
3. Click the New button.
4. Enter the following information. For some fields, you can either enter the name of a value or click the Browse button to select a value from a list:
 - Name—The name of the Objective Table. You must specify a value for this property, and that value must be unique within the Configuration Database (in an enterprise environment) or the Tenant (in a multi-tenant environment).
 - Description—A brief description of the Objective Table.
 - Type—Select Contract to create an Objective Table that is a Cost Contract.
 - Total Prepaid Cost—The prepaid contract cost, for Volume Rate Contracts only.
 - Time Zone—The Time Zone for this Cost Contract and the Interaction Types specified in the General tab.
 - Start—The date on which to start the Cost Contract.
 - End—The date on which to end the Cost Contract.

Important

Refer to the [Universal Routing 8.0 Routing Application Configuration Guide](#) for more information.

5. Click the Apply button to save the Cost Contract. The Objective Records tab displays.
6. In the Objective Records tab, click the Add button.
7. Enter the following information in the pop-up window that displays on your screen:
 - Media Type—The type of media technology used for information exchange, for example voice, e-mail, and fax. The range of Attribute Values for this field is defined within Media Type Business Attribute.
 - Service Type—The service that a customer is requesting. The range of Attribute Values for this field is defined within Service Type Business Attribute.
 - Customer Segment—Categorizes a customer based on their revenue potential to the enterprise relative to a business line. The range of Attribute Values for this field is defined within Customer Segment Business Attribute.
 - Service Objective Goal—Service Objective Goal defined for this Record. For voice interactions, this is the target time for the voice call to be answered by a live agent.

- Service Objective Delta—Service Objective Delta defined for this Record. Defines the step for Service Objective Goal deviation.
- Click the OK button.

Important

Refer to the [Universal Routing 8.0 Routing Application Configuration Guide](#) for more information.

8. Click the Save button.
