Genesys Administrator Extension Help

[Prerequisites](#)

5/8/2025

Prerequisites

Before you start deploying a Solution Package by using Genesys Administrator Extension, make sure that you have performed the following tasks:

- Install the latest version of Local Control Agent (LCA) on the target hosts. This also installs and configures the Genesys Deployment Agent on each host. Refer to the [Framework 8.1 Deployment Guide](#) for instructions.
- Install Java SDK on the target hosts to enable them to process the deployment instructions.
- [Upload](#) the necessary IPs into the IP Repository.

Refer to the [Genesys Administrator Extension Deployment Guide](#) for a complete list of prerequisites requires for Genesys Administrator Extension and Solution Deployment.
