Deployment Guide 2

Configures HTTP security for Co-browse resources.

disableCaching

Default value: false Valid Values: true, false

Changes take effect: Immediately

Disables HTTP client / proxy caching for all resources including static resources. When the option value is set to true, ZAP proxy does *not* generate the following warnings:

- Incomplete or no cache-control and pragma HTTPHeader set (Low Risk)
- Secure page browser cache (Medium Risk)

When the option is set to false or has no set value:

- Static resources are cached according to the option values set in the static-web-resources section.
- · Dynamic data exchange is not cached.
- Proxied resources are cached in accordance with caching policy of the original resources.
