Genesys Customer Experience Insights Project Guide

Agent Metrics

Agent Metrics

Use metrics in the Agent folder to build agent-related reports.

Note the following:

- Unless other wise noted, metrics that show time, display a whole integer representing the number of seconds.
- For detailed information about the different metric types, see Project terminology and concepts.

Important

Objects in each folder or subfolder are designed to be used together to create reports. Avoid mixing attributes and metrics from multiple folders into your reports. One exception to this rule is objects in the Time folder; Time attributes can be used in any report, and most reports include at least one attribute from the Time folder.

The following Metrics are available in this folder and are described on this page.

Folder: Agent

Metric name: Start Da	ate Time Key	Folder:
		Agent
Description: This metric is reserved for internal use to employ a key for a particular date and time from the AG2_AGENT, AG2_AGENT_GRP, or AG2_AGENT_QUEUE hierarchies.		
Source or Calculation: AG2_AG2_AGENT_GRP[*].DATE_TIME AG2_AGENT_QUEUE_[*].DATE_T	_KEY,	Used in:
Media type: All Data type: Number Metric type:		This metric is not used in any reports.
>> Back to list		

Folder: Agent > Activity

Metric name: % Abandoned Inviting	Folder:	
	Agent > Activity	
Description: The percentage of interactions that entered the contact center, were distributed to a resource, and subsequently abandoned while alerting/ringing at an agent's DN. This count includes short-abandoned interactions, and relies on the value of the short-abandoned threshold as configured in the [agg-gim-thld-ID-IXN] section.		
Source or Calculation: Calculated based on the Abandoned Inviting and Offered Business Attribute metrics.	Used in:	
Media type: Voice, Chat,	This metric is not used in any reports.	

Open (sync)

Data type: Number Metric type: Disposition

>> Back to list

Metric name: % Transfer Initiated

Folder:
Agent > Activity

Description: The description of this metric depends on attributes and filters in the report query:

• Agent Attribute: The percentage of accepted customer interactions that were transferred (warm or blind) by this agent.

• Agent Group Attribute: The percentage of accepted customer interactions that were transferred (warm or blind) by agents who belong to this agent group.

Source or Calculation: Calculated based on the Transfer Initiated and Accepted Activity metrics.

Media type: All

Data type: Number **Metric type:** Disposition

- Task Routing Agent Group Activity

>> Back to list

Metric name: % Transfer Received Accepted

Folder:

Agent > Activity

Description: The description of this metric depends on the attributes and filters in the report query:

- Agent Attribute: The percentage of accepted customer interactions that were successfully transferred (warm or blind) to this agent.
- Agent Group Attribute: The percentage of accepted customer interactions that were successfully transferred (warm or blind) to agents who belong to this agent group.

Source or Calculation: Calculated based on the Transfer Initiated Agent and Accepted Agent Queue metrics.

Used in:

Media type: All

Data type: Number Metric type: Disposition	Agent Group Interaction Handling Report
>> Back to list	

>> Back to list		
Metric name: Abandoned Inviting		Folder: Agent > Activity
Description: The total number of times that interactions were abandoned/dropped while the interactions were alerting/ringing (for Agent, Group, or Agent and Queue, depending on GCXI Project attributes).		
Source or Calculation: AG2_AGENT_[*].ABANDONED_INVITE		Used in:
Media type: Voice, Chat, Open (sync) Data type: Number Metric type: Disposition		Agent Conduct ReportAgent Performance DashboardAgent Report
>> Back to list		

Metric name: Accepted	Folder:
	Agent > Activity

Description: The description of this metric varies depending on attributes and filters in the report query:

- Agent Attributes: The total number of times that customer interactions or warm consultations were accepted, answered, pulled, or initiated by this agent.
- Agent Group Attributes: The total number of times that customer interactions or warm consultations were accepted, answered, pulled, or initiated by agents who belong to this agent group.

For voice media, this metric is identical to Activity\Responses.

Source or Calculation: AG2_AGENT_[*].ACCEPTED, AG2_AGENT_GRP_[*].ACCEPTED		Used in:

	 Task Routing Agent Activity Task Routing Agent Group Activity
>> Back to list	

Metric name: Accepted Thread

Folder:

Agent > Activity

Description: The description of this metric varies depending on attributes and filters in the report query:

- Agent Attributes: The total number of customer-interaction threads that were accepted, pulled, or initiated for the first time by this agent.
- Agent Group Attributes: The total number of customer-interaction threads that were accepted, pulled, or initiated for the first time by agents who belong to this agent group.

This metric includes an agent's first participation in outbound replies to inbound interactions, and, for media other than email, yields the same values as the metric Accepted Unique.

Source or Calculation: AG2_AGENT_[*].ACCEPTED_THREAD, AG2_AGENT_GRP_[*].ACCEPTED_THREAD	Used in:
Media type: Async Data type: Number Metric type: Disposition	Agent Interaction Hierarchy Report
>> Back to list	

Metric name: Accepted Unique

Folder:

Agent > Activity

Description: The description of this metric varies depending on attributes and filters in the report query:

- Agent Attributes: The total number of logical interactions that were accepted, pulled, or initiated for the first time by this agent.
- Agent Group Attributes: The total number of logical interactions that were accepted, pulled, or initiated for the first time by agents who belong to this agent group.

Source or Calculation: AG2_AGENT_[*].ACCEPTED_UNIQUE, AG2_AGENT_GRP_[*].ACCEPTED_UNIQUE		Used in:
Media type: All Data type: Number		Agent Interaction Hierarchy Report
Metric type: Disposition		

>> Back to list

Metric name: Actionability

Folder:

Agent > Activity

Description: The description of this metric varies depending on attributes and filters in the report query:

- Agent Attributes: The total score, assigned to interactions that were handled by this agent, that measures the degree to which interactions required agent attention.
- Agent Group Attributes: The total score, assigned to interactions that were handled by agents who
 belong to this agent group, that measures the degree to which interactions required agent attention.

This metric includes an agent's first participation in outbound replies to inbound interactions, and, for media other than email, yields the same values as the metric Accepted Unique. See Configuring Social Media User Data in the Genesys CX Insights User's Guide for more information.

Metric type:			
	>> Back to list		

Metric name: Agent Disconnect First

Folder:

Agent > Activity

Description: The value presented in this metric varies depending on the attributes and filters used in a report:

- Agent Attribute: For voice interactions, the total number of times during the reporting interval that this agent released customer interactions before the other party did. For multimedia interactions, serves as a flag to indicate whether the interaction was stopped by one of the parties or by some outside entity (for example, Interaction Server or a Media Server).
- Agent Group Attribute: For voice interactions, the total number of times during the reporting interval that agents from this group released customer interactions before the other party did. For multimedia interactions, serves as a flag to indicate whether the interaction was stopped by one of the parties or by some outside entity (for example, Interaction Server or a Media Server).

The tally is incremented only when the system (such as the switch) provides such information.

Source or Calculation: AG2_AGENT_[*].AGENT_DISCONNECT_FIRST, AG2_AGENT_GRP_[*].AGENT_DISCONNECT_FIRST	Used in: • Agent Conduct Report
Media type: Chat, Open (sync), Voice	Agent Conduct Report Agent Performance Dashboard
Data type: Number Metric type: Disposition	Agent Report
>> Back to list	

Metric name: Avg Actionability Score

Folder:

Agent > Activity

Description: The value presented in this metric varies depending on the attributes and filters used in a report:

- Agent Attribute: The average score, assigned to interactions that were handled by this agent, measuring the degree to which interactions required agent attention.
- Agent Group Attribute: The average score, assigned to interactions that were handled by agents belonging to this agent group, measuring the degree to which interactions

The average considers only those interactions for which an Actionability Score was assigned.

Source or Calculation: Calculated as AG2_AGENT_[*].ACTIONABILITY divided by AG2_AGENT_[*].ACTIONABILITY_OFFERED, or AG2_AGENT_GRP_[*].ACTIONABILITY divided by AG2_AGENT_GRP_[*].ACTIONABILITY_OFFERED

Used in:

Metric name: Avg Consult Received Warm Time

Folder:

Agent > Activity

Description: The value presented in this metric varies depending on the attributes and filters used in a report:

- Agent Attribute: The average amount of time that this agent was engaged as a recipient in collaborations or consultations, including related hold durations, where the collaborations/ consultations were associated with customer interactions.
- Agent Group Attribute: The average amount of time, in seconds, that agents who belong to this agent group were engaged as a recipient in collaborations or consultations, including related hold durations, where the collaborations/consultations were associated with customer interactions.

This metric is attributed to the interval in which the consult interaction is offered to the receiving agent. This metric excludes alert (ring) and ACW (Wrap) durations associated with the consult interactions.

Source or Calculation: Calculated based on the Consult
Received Warm Time and Consult Received Accepted Warm
Activity metrics.

Metric name: Avg Consult Received Wrap Time

Folder:

Agent > Activity

Description: The value presented in this metric varies depending on the attributes and filters used in a report:

- Agent Attribute: The average amount of time that this agent was in ACW (Wrap) state following simple consultations that the agent accepted, where the consultations were associated with customer calls.
- Agent Group Attribute: The average amount of time that agents who belong to this agent group were in ACW state following simple consultations that the agents accepted, where the consultations were associated with customer calls.

This duration does not stop if the agents received or made calls while in ACW state. This metric is attributed to the interval in which this agent was offered the consult interaction for which ACW was invoked.

Source or Calculation: Calculated based on the Consult Received Wrap Time and Consult Received Wrap Activity metrics.	Used in:Agent Performance Dashboard

Metric name: Consult Received Warm Hold

Folder:

Agent > Activity

Description: The description of this metric varies according to the attributes and filters in the report query:

• Agent Attribute: The total number of consultations that this agent had on hold where the consultations were associated with customer interactions, the agent was the recipient of the consultation requests,

and the interactions were transferred to or conferenced with the agent.

 Agent Group Attribute: The total number of consultations that agents, who belong to this agent group, had on hold where the consultations were associated with customer interactions, the agents were the recipients of the consultation requests, and the interactions were transferred to or conferenced with the agents.

Source or Calculation: AG2_AGENT_[*].CONSULT_RCV_WARM_HOLD, AG2_AGENT_GRP_[*].CONSULT_RCV_WARM_HOLD	Used in:
Media type: Voice	This metric is not used in any reports.
Data type: Number Metric type: Disposition	
>> Back to list	

Metric name: Consult Received Warm Time | Folder:

Agent > Activity

Description: The description of this metric varies according to the attributes and filters in the report query:

- Agent Attribute: The total amount of time that this agent was engaged as a recipient in collaborations or consultations, including related hold durations, where the collaborations/consultations were associated with customer interactions.
- Agent Group Attribute: The total amount of time that agents who belong to this agent group were
 engaged as a recipient in collaborations or consultations, including related hold durations, where the
 collaborations/consultations were associated with customer interactions.

This metric is attributed to the interval in which the consult interaction is offered to the receiving agent. Time begins when the consult interaction is received and ends when the customer interaction is transferred to or conferenced with this agent. This metric excludes alert (ring) and ACW (Wrap) durations associated with the consult interactions.

Source or Calculation: Calculated as the sum of
AG2_AGENT_[*].CONSULT_RCV_WARM_ENGAGE_TIME and
AG2_AGENT_[*].CONSULT_RCV_WARM_HOLD_TIME, or
AG2_AGENT_GRP_[*].CONSULT_RCV_WARM_ENGAGE_TIME and

Folder: Agent > Detail > Session

Metric name: Active Time Folder: Agent > Detail > Session **Description:** The total amount of time that elapsed between the beginning and end of this agent's login session(s) on a particular media channel, irrespective of the intervals in which the resource session occurs. If an agent logs into multiple DNs, login duration is measured from the moment at which the agent logs in to the first DN to the moment at which the agent is no longer logged in to any DN. If the agent's session was still active when the data was compiled, the agent's session duration appears as null If the agent is not forcibly logged out when the calendar dates ends, login duration is split over both days. Source or Calculation: SM_RES_SESSION_FACT_GI2.TOTAL_DURATION Used in: Media type: All · Agent Login-Logout Details Report Data type: Number Metric type: Detail >> Back to list **Metric name: Group Combination Detail** Folder: Session Agent > Detail > Session **Description:** This metric is reserved for internal use to employ a key for a particular resource-group combination from the SM RES SESSION FACT table. Used in:

Agent Omnichannel Activity Report

Metric name: % Other State Time Folder:

Agent > State and Reason > Summarized State

Description: The percentage of time within the interval that this agent's state was unknown (that is, neither Ready nor NotReady) after login, relative to the total duration within the interval of the agent's active session on a particular media channel.

The situation in which an agent's state is neither Ready nor NotReady can occur if the switch, for instance, does not force agents' DNs into the Ready state upon login.

Metric name: Active Time

Folder:

Agent > State and Reason > Summarized State

Description: The total amount of time that elapsed between the beginning and end of this agent's login session(s) on a particular media channel, irrespective of the intervals in which the resource session occurs. If an agent logs into multiple DNs, login duration is measured from the moment at which the agent logs in to the first DN to the moment at which the agent is no longer logged in to any DN. If the agent's session was still active when the data was compiled, the agent's session duration appears as null in the reports.

If the agent is not forcibly logged out when the calendar dates ends, login duration is split over both days.
