Genesys Customer Experience Insights Project Guide

Queue folder

Queue folder

The Queue folder contains numerous objects that enable the organization and filtering of Info Mart data based on queue-related information. The folder is organized into a series of subfolders, to make it easier to find the objects you need, as described in the following table. Many folders contain Custom folders, which are not described in this document; custom folders are provided to store any custom objects.

Important

Objects in each folder or subfolder are designed to be used together to create reports. Avoid mixing attributes and metrics from multiple folders into your reports. One exception to this rule is objects in the Time folder; Time attributes can be used in any report, and most reports include at least one attribute from the Time folder.

Queue folder and subfolders

This folder contains the following root folder and subfolders.

- Queue
- Queue > Q Consults
- Queue > Q Customer
- Queue > Q Customer & Consults
- Queue > Q Customer & Consults > Abandoned Waiting ST1
- Queue > Q Customer & Consults > Accepted Agent ST1
- Queue > Queue Predictive Routing
- Queue > Queue User Data Example

Folder: Queue

Introduced: 9.0.007.03

Description: The root folder for queue-related subfolders and their components. Refer to the descriptions of the following subfolders for more information:

- Q Consults
- Q Customer
- Q Customer & Consults
- Q Predictive Routing
- Queue User Data Example

Metrics:

- % Abandoned Inviting

Folder: Queue > Q Consults

Introduced: 9.0.007.03

Description: All objects in this folder enable the organization, measurement, and filtering of Info Mart data based on the queue(s) through which consult interactions pass. Counts and duration metrics are attributed to the reporting interval in which interactions entered the queue—even for agent-related

metrics.

Metrics:
