Report descriptions

This page lists the historical reports and dashboards, organized by folder, that are included with Genesys Customer Experience Insights (Genesys CX Insights). This document is valid only for the 9.0.x releases of Genesys CX Insights, and is intended for on-premise deployments of Genesys CX Insights. If you have Genesys CX Insights in the Genesys Engage cloud, see the [Reporting in the cloud](#) guide.

To view a sample of the output from a report, follow the relevant link on the tabs below, then on the report description page, click 'Sample XXX Report.pdf'.

To view more detailed information about each report, including sample report output, click the report name.

Reports and dashboards

Reports and dashboards are found in the **Shared Reports > CX Insights** folder, and are organized into the following sub folders:

- [Agents](#)
- [Billing Data](#)
- [Business Results](#)
- [Callback](#)
- [Chat](#)
- [Chat Bot](#)
- [Co-browse](#)
- [CX Insights for iWD](#)
- [Dashboards](#)
- [Designer](#)
- [Details](#)
- [Email](#)
- [Outbound Contact](#)
- [Predictive Routing](#)
- [Queues](#)

Video: Navigate and find reports in GCXI

[Link to video](#)

This video describes how to navigate in Genesys CX Insights, and find relevant reports.

The Agents folder

The **Agents** folder contains reports that enable you to gather various contact center statistics that pertain to monitored agents (configured as Person objects in Configuration Server) who process voice, chat, SMS, email, social media, and third-party-media type interactions:

Agent Conduct Report

Use this report to contrast agent interaction handling performance against the agent group performance, based on various metrics, including Accepted/Rejected, Responses, and Handle Time, Hold Time, Wrap Time, and whether a Consult was initiated.

[>> Back to Top](#)

Agent Details Activity Report

Use this report to view a chronological breakdown of agent activities, including times and duration of login sessions and status of agent devices / DNs, and relevant interaction states.

[>> Back to Top](#)

Agent Group Business Attribute Report

Use this report to contrast agent group interaction handling activities against the revenue generated, based on Business Result, Customer Segment, and Service Type for each media type and interaction type. This report is stored in the Details folder.

[>> Back to Top](#)

Agent Group Interaction Handling Report

Use this report to monitor the interaction processing performance of groups of agents over specific day ranges. The report displays information about Handle Time, Engage Time, Wrap Time, and various transfer initiation and acceptance metrics.

[>> Back to Top](#)

Agent Group Membership Details Report

Use this report to generate a detailed view of how agents are distributed among Agent Groups, including information about when each Agent entered and exited each group.

[>> Back to Top](#)

Agent Group Queue Business Attribute Report

Use this report to understand agent-activity results categorized by a wide range of attributes, including Agent Group, Business Result, Customer Segment, Interaction Type, Media Type, Queue, and Service Type.

[>> Back to Top](#)

Agent Interaction Hierarchy Report

Use this report to understand the hierarchy of interactions that were offered to agents, including the nature of the accepted interactions and responses (whether interactions were threaded, logical, or base).

[>> Back to Top](#)

Agent Interval Based Report

Use this report to view key performance indicators related to the agents, and thereby assess agent productivity.

[>> Back to Top](#)

Agent Login-Logout Details Report

Use this report to review the times when agents logged in and out and the duration of each login

session during a range of hours that you specify within a day. The report is stored within the Details folder.

[>> Back to Top](#)

Agent Not Ready Report

Use this report to understand the reasons given for the time agents spent in a NotReady state.

[>> Back to Top](#)

Agent Not Ready Reason Code Report

Use this report to monitor the counts, durations, and percentages of calls that are made and received by an agent, while that agent's state is NotReady, during a range of hours that you specify within a particular day.

[>> Back to Top](#)

Agent Omnichannel Activity Report

This report provides a breakdown of the duration of the different states that an agent can be in (Ready, Not Ready, Busy, and Other), across all media channels, fully accounting for the agent's interaction time (time spent handling interactions).

[>> Back to Top](#)

Agent Outbound Campaign Report

Use this report to understand the success of your outbound campaigns, by reviewing total and average durations of call handling activities (including Handle Time, Wrap Time, Preview Time, Engage Time, and Hold Time) for each agent.

[>> Back to Top](#)

Agent Queue Report

Use this report to understand agent interaction-processing on a queue-by-queue basis, based on Engage, Hold, and Wrap times and percentages.

[>> Back to Top](#)

Agent Social Engagement Report

Use this report to view, for each agent and day, detailed information about average social media scores in each configured standard response, or category. The report includes averaged Sentiment, Influence, and Actionability scores.

[>> Back to Top](#)

Agent State Details Report

Use this report for monitoring an agent's noncall-related activities, especially under those circumstances in which the agent is paid by the minute. The report is stored in the Details folder.

[>> Back to Top](#)

Agent Summary Activity Report (Active)

Use this report to understand how much of agents' total active time was spent in each state, broken down by media type. The report breaks down agent time based on both the Active Time (the amount of active time) and the % Active Time (the percentage of active time) in each state.

[>> Back to Top](#)

Agent Summary Activity Report (Interaction)

Use this report to understand how much of agents' interaction time was spent in each state, broken down by media type.

[>> Back to Top](#)

Agent Utilization Report

Use this report to understand how agents perform on a daily basis by analyzing interaction volumes, call times, and consult data.

[>> Back to Top](#)

Agent Wrap Report

Use this report to monitor the after-call work (wrap) call-related activities that agents (or agent groups) perform after processing calls.

[>> Back to Top](#)

Weekly Agent Group Performance Dashboard

Visualizations that illustrate weekly interaction handling at the group level.

[>> Back to Top](#)

Weekly Agent Group Utilization Dashboard

Visualizations you can use to understand how much of agent total active time was spent in each state.

[>> Back to Top](#)

The Billing Data folder

The **Billing Data** folder contains reports that provide statistics about your consumption of billable Genesys services.

IVR Usage Report

View information about Genesys Voice Platform (GVP) usage, as represented by daily and monthly totals of IVR Minutes and IVR Ports. This report is available in two versions: Daily and Monthly. If you have enabled the BDS metrics for GVP minutes or ports (gvp_minutes and gvp_ports), these reports provide summary information about Designer usage details tied to these metrics, over the indicated time period.

[>> Back to Top](#)

Inbound Voice User Report

View information about Named and Concurrent Users Count usage. This report provides detailed information about the Named and Concurrent Users Count usage during the selected period. You can drill on the Named User metric to see the discrete users associated with the count.

[>> Back to Top](#)

The Business Results folder

The **Business Results** folder contains reports that provide statistics that pertain to business results, customer segment, and service type/subtype business attributes:

Business Metrics Executive Report

Use this report to monitor contact center performance, particularly if you are outside of the immediate contact center, and to gauge service level within the perspective of the total number of interactions that were offered to resources, by day.

[>> Back to Top](#)

Customer Perspective Executive Report

Use this report to understand such key indicators as how much time elapsed before customers were connected to agents or received responses, how satisfied customers were with their transactions, and how much money they spent.

[>> Back to Top](#)

Interaction Volume Business Attribute Report

Use this report to understand the Business Result for interactions, to contrast that result against the Service Level and against callers' initial objective, and to understand outcomes in light of various interaction handling metrics.

[>> Back to Top](#)

Weekly Business Attribute Dashboard

Detailed information and visualizations illustrating how interactions that enter the contact center are categorized into the business-result attributes that are configured in your environment.

[>> Back to Top](#)

The Callback folder

The **Callback** folder contains reports that provide information about callback usage, including information about success rates, scheduling, and wait times:

Callback Details Report

Use this report to view a detailed picture of how Callback is used in your contact center, including information about the volume of callback calls, success rates, resulting savings, and customer wait times.

[>> Back to Top](#)

Callback Summary Report

Use this report to view a comprehensive picture of how Callback is used in your contact center, including detailed information about the volume of callback calls, success rates, resulting savings, and customer wait times.

[>> Back to Top](#)

The Chat folder

The **Chat** folder contains reports that provide detailed information about chat activities in the contact center.

[>> Back to Top](#)

Asynchronous Chat Dashboard

Use this dashboard to view detailed information about asynchronous chat sessions in the contact center. Asynchronous (Async) chat sessions are single chat sessions between a customer and a contact center that last for a long period of time (potentially several days). Agents can return a chat session back into the workflow (into a dormant state), and then reconnect to the session later.

[>> Back to Top](#)

Chat Message Statistics Report

Use this report to learn more about how chat is used in the contact center.

[>> Back to Top](#)

Chat Termination Report

Use this report to learn more about how chat calls that terminated.

[>> Back to Top](#)

Interaction Acceptance Dashboard

Use this dashboard to understand how long it takes for agents to accept customer interactions, and to identify what percentage of interactions are accepted promptly, or with some delay.

[>> Back to Top](#)

Interaction Acceptance Report

Use this report to view statistics about the acceptance of interactions by agents, including the amount of time it takes for agent to accept interactions, and the number and percentage of interactions that were accepted quickly, or with a delay.

[>> Back to Top](#)

Pre-Agent Termination Report

Use this report to learn more about calls that terminated before connecting to an agent.

[>> Back to Top](#)

The Chat bot folder

Reports in the **Chat Bot** folder are ready-to-use, but as always, can be modified to suit your specific business needs.

[>> Back to Top](#)

Bot Dashboard

The Bot Dashboard provides a dashboard-style summary that you can use to evaluate the impact of Chat Bot, including visualizations of session and message volumes, and breaks down sessions based on whether bots, agents, or both, were involved.

[>> Back to Top](#)

The Co-browse folder

The **Co-browse** folder contains reports you can use to learn more about agent handling of contact center interactions involving Co-browse sessions.

[>> Back to Top](#)

Co-browse Detail Report

Use this report to view segment-related details pertaining to agent handling of contact center

interactions that include Co-browse sessions. The report provides detailed information about Co-browse sessions, including durations, browsing modes, and pages visited.

[>> Back to Top](#)

Co-browse Summary Report

Use this report to learn how each agent handles interactions involving Co-browse sessions, by contrasting Co-browse session counts, session durations, and the percentage of interactions that include Co-browse.

[>> Back to Top](#)

The CX Insights for iWD folder

The **CX Insights for iWD** folder contains reports that provide information about contact center interactions involving Genesys Info Mart and intelligent Workload Distribution (iWD).

Capture Point Business Value Report

Use this report to understand the distribution of tasks by process and point of entry (capture point) into the iWD system, and thereby assess whether the time to complete tasks correlates with the desired business value and time to complete for a busy enterprise, which can help you to better tune priority schema and priority levels for processes, capture points and departments.

[>> Back to Top](#)

Capture Point Dashboard

Use this dashboard to understand the business value driven through capture points, and the volume of work processed through each capture point. The dashboard breaks down the overall average duration time that is spent to complete tasks (from inception within the presource system to termination within iWD) into average task durations at defined milestones along a task's routed path for each capture point. The dashboard also displays the business value range into which the tasks fall, the average time that it took to complete the tasks, and plots the total number of finished tasks against their assigned business value range.

[>> Back to Top](#)

Capture Point Task Duration Report

Use this report to identify and plan remediation for bottlenecks in the system. The technical business user can then tune routing strategies and associated business rules in order to reduce bottlenecks and routing milestones. This is particularly useful if you base distribution strategies or business operations around the point (the capture point) through which tasks enter the iWD system.

[>> Back to Top](#)

Customer Segment Service Level Report

Use this report to learn more about the number of new tasks, number of completed tasks and percentage of all tasks that were completed during the reporting interval, by day, by customer

segment, and by business process.

[>> Back to Top](#)

Customer Segment Service Level Dashboard

Use this dashboard to learn more about the fulfillment of Service Level Agreements, by exploring the percentage of tasks that were completed during a specified interval. The dashboard illustrates the handling volumes by customer segment and business process, allowing you to compare achievements against your business objectives with a focus on each customer segment's progress over time.

[>> Back to Top](#)

ETL Audit Dashboard

Use this dashboard to view a historical overview of iWD Datamart job execution statistics, including duration and status, and to explore other, more detailed information from the ETL_AUDIT table.

[>> Back to Top](#)

Intraday Process Dashboard

Use this dashboard to see an intraday overview of the completed iWD tasks that were overdue, along with the counts, percentages, and averages of completed iWD tasks, breaking down the average amount of time it took to complete tasks using three key metrics: Avg Finish Time — measuring the average time it took for tasks to be completed after entering the system, Avg Accept Time — measuring the average amount of time that tasks were backlogged before they reached a handling resource, and Avg Handle Time — measuring the average amount of time that resources worked on tasks. The dashboard also provides an overview of the task backlog for a day or reporting interval, providing summary information about how many tasks are pending, how many tasks are overdue, and how many of the completed tasks were overdue. Data is organized by day, tenant, department, and business process.

[>> Back to Top](#)

Intraday Process Report

Use this report to view information about the performance of historical and pending work items, to learn more about sources of backlog, about throughput, and to understand how often tasks become overdue before they are finished.

[>> Back to Top](#)

Queue Duration and Priority Dashboard

Use this dashboard to track tasks from inception within the presource system, through to completion within iWD, and gain insight into average task durations at defined milestones along a task's distribution path. The dashboard also allows you to analyse tasks based on ranges of queue priorities and, various processing milestones from which tasks were distributed or proceeded through prior to completion.

[>> Back to Top](#)

Queue Priority Range Report

Use this report to tune the priorities in the rules system and routing strategies in order to reduce average durations at processing milestones. This report is particularly useful if you manage your operations around service level-based or business outcome-based priorities.

[>> Back to Top](#)

Queue Throughput Report

Use this report to examine a holistic view of tasks in queues (New, Cancel, Rejected, Completed, etc). You can view tasks by processes within departments to analyze how tasks pass through business process steps associated with queues in a given time interval.

[>> Back to Top](#)

Queue Task Duration Report

Use this report to gain insight into the movement of tasks through the iWD system, thereby troubleshooting business rules and routing strategies.

[>> Back to Top](#)

Resource Performance Dashboard

Use this dashboard to quickly identify which day of the month, department, and process is occupying resource time.

[>> Back to Top](#)

Resource Performance Report

Use this report to understand how resources handle tasks over specific time periods. Gaining insights and the variability of performance for each process, department, and days the resource worked.

[>> Back to Top](#)

Task Age Dashboard

Use this dashboard to better understand how well each department and process is meeting Service Level Agreements. The dashboard provides detailed information about the volume of tasks that are handled within the defined Service Level interval, and the volume that breach the Service Level Agreement for departments and processes.

[>> Back to Top](#)

Task Age Report

Use this report to better understand how well each department and process is meeting Service Level Agreements. This report provides detailed information about the volume of tasks that are handled within the defined Service Level interval, and the volume that breach the Service Level Agreement for departments and processes.

[>> Back to Top](#)

Task Detail Report

Use this report to understand the raw details of individual work items when viewed from the customer perspective. Many filters are provided to facilitate troubleshooting, identification, and validation of the results.

[>> Back to Top](#)

Task Work Detail Report

Use this report to understand the employees who helped solve a task where the task involved more than one employee, the names of the queues that distributed the tasks to the employees and more

[>> Back to Top](#)

The Dashboards folder

The **Dashboards** folder contains out-of-box dashboards, each of which collects two or more quasi-related GCXI reports into visual summaries using charts, graphs, other diagrammatic devices.

ANI Details Dashboard

Provides detailed information about the outcomes of customer interactions, based on Automatic Number Identification (ANI), enabling you to identify frequent callers and the result of their interactions.

[>> Back to Top](#)

Agent Performance Dashboard

Use this dashboard to view detailed information about agent activity in the contact center, including information about handle time, interaction volume, and relative ranking compared to other agents.

[>> Back to Top](#)

Bot Analytical Dashboard

Use this dashboard to learn more about bot activity, and how bots can help you improve customer experience with Genesys Designer.

[>> Back to Top](#)

Contact Center Dashboard

Use this dashboard to view detailed information about interaction volumes and KPIs for the whole contact center.

[>> Back to Top](#)

Final Disposition Dashboard

Use this dashboard to analyze trends in interaction outcomes by viewing detailed information over

time periods you specify, about the number and percentage of interactions that enter the Designer Application and conclude in the Self-Service phase, compared to the number that enter the Assisted-Service phase and are routed to a DN or agent.

[>> Back to Top](#)

Milestone Path Analysis Dashboard

Provides detailed information and visualizations illustrating the first and last milestones customers traversed, and the number of sessions that ended in each final disposition.

[>> Back to Top](#)

Queue Dashboard

Use this dashboard to compare the performance of queues by viewing detailed information about agent performance on a queue-by-queue basis.

[>> Back to Top](#)

TransferDashboard

A dashboard-style summary that you can use to track a wide variety of metrics related to transfers, consult, and conference calls.

[>> Back to Top](#)

Supervisor Dashboard

Use this dashboard to evaluate interaction handling and agent performance at a glance. It includes both key information about interaction volume and customer experience, and charts to illustrate each agent's activity during the reporting period.

[>> Back to Top](#)

Weekly Agent Group Performance Dashboard

Visualizations that illustrate weekly interaction handling at the group level.

[>> Back to Top](#)

Weekly Agent Group Utilization Dashboard

Visualizations you can use to understand how much of agent total active time was spent in each state.

[>> Back to Top](#)

Weekly Business Attribute Dashboard

Detailed information and visualizations illustrating how interactions that enter the contact center are categorized into the business-result attributes that are configured in your environment.

[>> Back to Top](#)

Weekly Queue Summary Dashboard

Visualizations that help you assess the weekly performance of configured queues, to understand what percentage of interactions in each queue were accepted within the defined service level, to detect high rates of abandonment, and to compare the performance of each queue in handling interactions.

[>> Back to Top](#)

Weekly Self Service Containment Dashboard

Detailed information and visualizations that you can use to learn about the number and percentage of interactions that enter each Designer Application and conclude in the Self-Service phase, compared to the number that enter the Assisted-Service phase and are routed to a DN or agent.

[>> Back to Top](#)

The Designer folder

The **Designer** folder contains reports that provide information about user experiences in self-service and assisted-service Interactive Voice Response (IVR) / Genesys Designer application sessions.

Activity Summary Report

Use this report to view summary information about activities in Designer applications, including the number of activities within a given time period, and the number and percentage of those activities that were complete or incomplete.

[>> Back to Top](#)

Application Duration Report

Use this report to learn more about Designer application session durations, either for full sessions, or separately for self-service and assisted-service.

[>> Back to Top](#)

Application Summary Report

Use this report to learn more about the final outcome of IVR Designer application sessions.

[>> Back to Top](#)

Assisted Service Interactions by Last Milestone Report

Use this report to learn more about calls that move from Self-Service into Assisted Service. Interactions are included in this report based on the last milestone where the interaction was routed to assisted service.

[>> Back to Top](#)

Blocks Summary Report

Use this report to learn more about the traffic in each block, and to assess the rate and type of errors in each block.

[>> Back to Top](#)

Bot Analytical Dashboard

Use this dashboard to learn more about bot activity, and how bots can help you improve customer experience with Genesys Designer.

[>> Back to Top](#)

Final Disposition Dashboard

Use this dashboard to analyze trends in interaction outcomes by viewing detailed information over time periods you specify, about the number and percentage of interactions that enter the Designer Application and conclude in the Self-Service phase, compared to the number that enter the Assisted-Service phase and are routed to a DN or agent.

[>> Back to Top](#)

Milestone Summary Report

Use this report to learn more about the frequency with which each milestone is hit, and the dispositions for calls that contained each milestone.

[>> Back to Top](#)

Self-Service Statistics Report

Use this report to learn about the number and percentage of interactions that enter the Designer Application and concluded in the Self-Service phase, compared to the number that enter the Assisted-Service phase and are routed to a DN or agent.

[>> Back to Top](#)

Survey Answer Report

Use this report to learn more about how customers answer post-call survey questions, including the number and percentage of times that each answer was selected, organized by application, agent group, question, or answer, over various time-periods.

[>> Back to Top](#)

Survey Statistics Report

Use this report to learn more about post-call surveys, such as how many surveys were offered, accepted, or not accepted, and how many No Input and No Match errors were generated.

[>> Back to Top](#)

Weekly Self Service Containment Dashboard

Detailed information and visualizations that you can use to learn about the number and percentage

of interactions that enter each Designer Application and conclude in the Self-Service phase, compared to the number that enter the Assisted-Service phase and are routed to a DN or agent.

[>> Back to Top](#)

The Details folder

The **Details** folder contains reports that provide detailed information about low-level interactions and agent.

[>> Back to Top](#)

Agent Details Activity Report

Use this report to understand the activities of particular agents over time, including login, status, and interaction details.

[>> Back to Top](#)

Agent Group Membership Details Report

Use this report to generate a detailed view of how agents are distributed among Agent Groups, including information about when each Agent entered and exited each group.

[>> Back to Top](#)

Agent Login-Logout Details Report

Use this report to view detailed information about the start times, end times, and durations of agent login sessions.

[>> Back to Top](#)

Agent State Details Report

Use this report to understand how agents use their noncall time, and understand the reasons given for various agent states.

[>> Back to Top](#)

Interaction Handling Attempt Report

Use this report to analyze detailed information about how much time interactions spend in each stage of their progress through the contact center.

[>> Back to Top](#)

The Email folder

The **Email** folder contains reports you can use to learn more about email interaction volumes, statistics, and outcomes in your contact center. Reports in the Email folder are ready-to-use, but as always, can be modified to suit your specific business needs.

Agent Summary Activity Email Report

Use this report to view detailed information about how each agent's active time was used when handling email interactions.

[>> Back to Top](#)

Agent Utilization Email Report

Use this report to view detailed information about how each agent's active time was used when handling email interactions.

[>> Back to Top](#)

Interaction Volume Business Attribute Email Report

Use this report to understand the Business Result for interactions, to contrast that result against the Service Level and against callers' initial objective, and to understand outcomes in light of various interaction handling metrics.

[>> Back to Top](#)

The Outbound Contact folder

The **Outbound Contact** folder contains reports that provide information about the progress of outbound campaigns, including summaries of campaign activity, campaign callbacks, and contact list performance:

Campaign Callbacks Summary Report

Use this report to understand the frequency with which Callback was used in your Outbound campaigns, and the overall Callback success rates.

[>> Back to Top](#)

Campaign Summary Report

Use this report to understand the disposition of Outbound campaign contact dialing attempts; whether calls connected, were dropped, or failed (together with the reason for failure).

[>> Back to Top](#)

Contact List Effectiveness Report

Use this report to determine which calling lists are working efficiently, and which need to be adjusted. The report contrasts, for each list, the number of outbound call attempts to the number of times the call failed to connect (a SIT tone was detected).

[>> Back to Top](#)

The Predictive Routing folder

The **Predictive Routing** folder contains reports and dashboards that enable you to learn more about how Genesys Predictive Routing (GPR) is used in your contact center, including information about how it impacts customer experience, wait times, issue resolution rates, and other key metrics.

Predictive Routing AHT & Queue Dashboard

The Predictive Routing - AHT & Queue Dashboard provides a dashboard-style summary that you can use to evaluate the impact on contact center efficiency of enabling Genesys Predictive Routing (GPR).

[>> Back to Top](#)

Predictive Routing Model Efficiency Dashboard

The Predictive Routing — Model Efficiency Dashboard provides a bubble-graph summary that you can use to evaluate the impact on contact center efficiency of enabling Genesys Predictive Routing (GPR), and compare the effectiveness of various GPR prediction models.

[>> Back to Top](#)

Predictive Routing A/B Testing Report

Use the Predictive Routing A/B Testing Report to track A/B testing results for predictive models and predictors. This report includes a First Contact Resolution Rate calculation, which allows you to quickly see how often customer concerns were resolved on the first attempt, and allows you to contrast interactions that were processed when Predictive Routing was switched ON compared to when it was OFF. The report also profiles response time, engage time, wrap time, and other relevant Key Performance Indicators (KPI).

[>> Back to Top](#)

Predictive Routing Agent Occupancy Dashboard

The Predictive Routing Agent Occupancy Dashboard provides a summary that you can use to evaluate the impact on contact center efficiency of enabling Genesys Predictive Routing (GPR).

[>> Back to Top](#)

Predictive Routing Detail Report

Use the Predictive Routing Detail Report to view detailed interaction-level data about how Genesys Predictive Routing (GPR) is used in your contact center, and to understand how it impacts Key Performance Indicators (KPI), including detailed metrics that profile agent scoring, and allow you to compare different models or predictors.

[>> Back to Top](#)

Predictive Routing Operational Report

Use the Predictive Routing Operational Report to track key Genesys Predictive Routing (GPR) operational statistics, including the number of interactions Offered and Accepted, and measures that indicate how long interactions waited to be scored, and how long they waited in queue.

[>> Back to Top](#)

Predictive Routing Queue Statistics Report

Use the Predictive Routing Queue Statistics Report to track KPIs for each Queue when Genesys Predictive Routing (GPR) is used to optimize routing. The report allows you to monitor overall interaction-processing performance of queues, including contrasting, for each Model and Predictor, the number of Offered and Accepted interactions, Accept, Handle, and Engage Time, as well as abandoned and service level measures.

[>> Back to Top](#)

The Queues folder

The **Queues** folder contains reports that enable you to gather data that pertains to interaction flows through monitored ACD queue, virtual-queue, interaction queue, workbin, and queue-group objects:

Abandon Delay Report

Use this report to evaluate the number and percentage of interactions that were abandoned (or disconnected) while queued at a specific queue, and the percentage abandoned by service time interval.

[>> Back to Top](#)

Interaction Traffic Group Report

Use this report to better understand the efficiency of interaction handling in each queue group, at a high level, including summaries of interactions offered, accepted, and abandoned, and the average times to accept or abandon.

[>> Back to Top](#)

Interaction Traffic Report

Use this report to evaluate the efficiency of queues by assessing the volume of interactions accepted in a given period, along with the average speed of answer (Avg Accept Time), maximum delays experienced before acceptance (Max Accept Time), and abandonment (Max Abandoned Waiting Time) from the perspective of the mediation DN.

[>> Back to Top](#)

Queue Outline Report

Use this report to see the interrelation of various queue-related metrics relevant to customer and consult interactions, and to understand how the metrics contribute to the sum total of all interactions that entered a queue resource.

[>> Back to Top](#)

Queue Summary Report

Use this report to assess the performance of configured queues, to understand what percentage of interactions in each queue were accepted within the defined service level, and to compare the performance of each queue in handling interactions.

[>> Back to Top](#)

Speed Of Accept (Hours) Report

Use this report to understand how long interactions (such as email or other media types with slower response times) waited in queue before being accepted.

[>> Back to Top](#)

Speed Of Accept (seconds) Report

Use this report to understand how brief interactions (such as voice and chat — media types with faster response times) waited in queue before being accepted.

[>> Back to Top](#)

Weekly Queue Summary Dashboard

Visualizations that help you assess the weekly performance of configured queues, to understand what percentage of interactions in each queue were accepted within the defined service level, to detect high rates of abandonment, and to compare the performance of each queue in handling interactions.

[>> Back to Top](#)
