Genesys Info Mart Physical Data Model for a Microsoft SQL Server Database

[View ADMIN_ETL_STEP_HISTORY](#)

View ADMIN_ETL_STEP_HISTORY

Description

This view provides information about the execution of each ETL job step. Rows are added to this view for completed ETL job steps only. As each ETL job completes, it adds rows for the completed steps of all currently running ETL jobs, including itself, that have not already been added to the view.

Currently running ETL jobs may have steps that are in process or are waiting, and they do not yet appear in the view. Rows in this view are written once and are not updated.

Column List

Column	Description
JOB_ID	ID that uniquely identifies the execution instance of the job.
JOB_NAME	The name of the job, such as Job_ExtractICON.
WORKFLOW_TYPE	The name of the ETL job step, such as Outbound.
JOB_VERSION	The version of the job, such as 8.1.000.10.
START_TIME	The date and time at which the first step started (UTC time zone).
END_TIME	The date and time at which the last step ended (UTC time zone).
DURATION	The duration of the job, in seconds.
STATUS	The status of the step, such as COMPLETE or FAILED.
