 - 1.5 Complete a Service, State, or Task

Context Services Interface

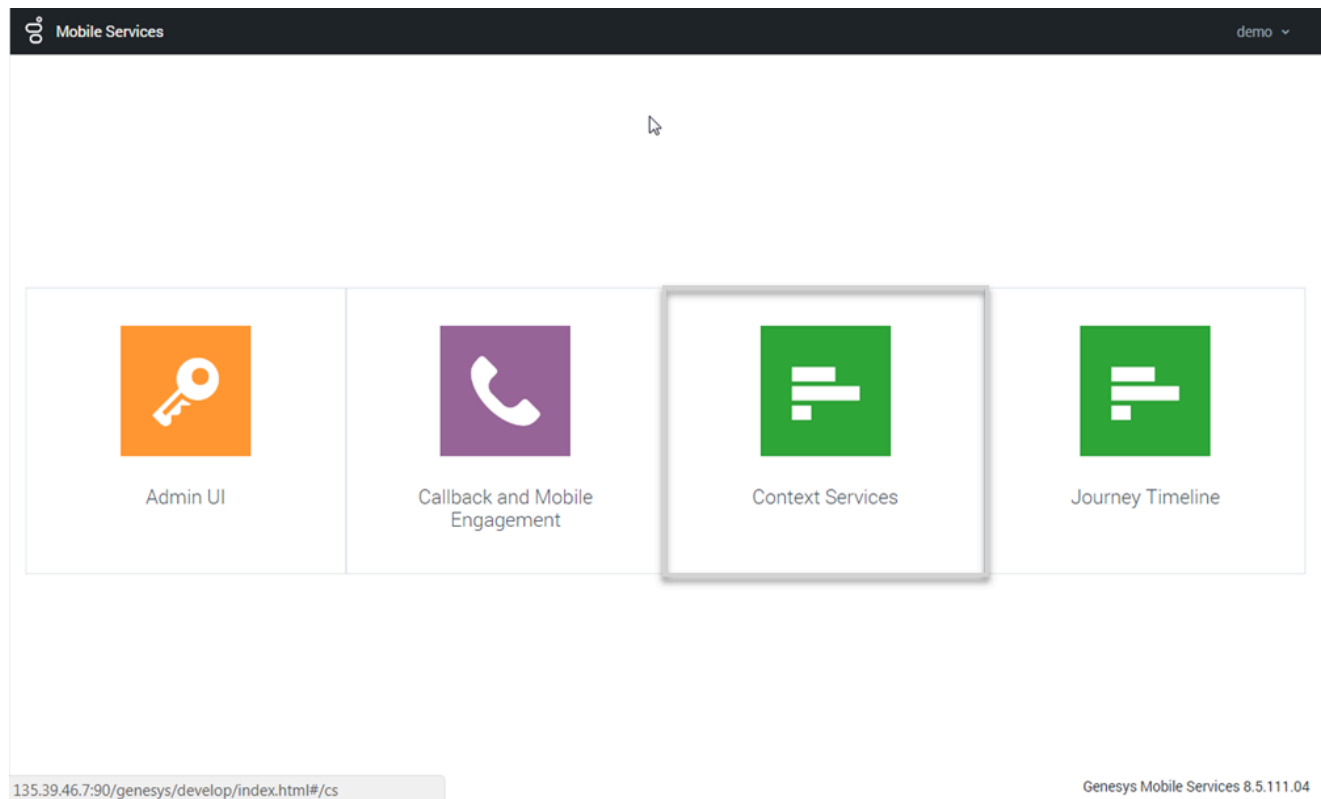

The Context Services Interface is a web-based interface that enables edition of Context Services data. This interface is intended to be used by developers and supervisors looking for detailed information about services because it is built to search for profiles, services, states, and tasks based on ID information or UCS information. It does not include all the search abilities that are available in typical agent interfaces.

This interface also enables you to modify or delete a given service.

Important

1. The Context Services Interface is available only for single-tenant installations.
2. If you change business attribute values in your configuration, users will need to refresh the Context Services Interface to see the changes taken into account.

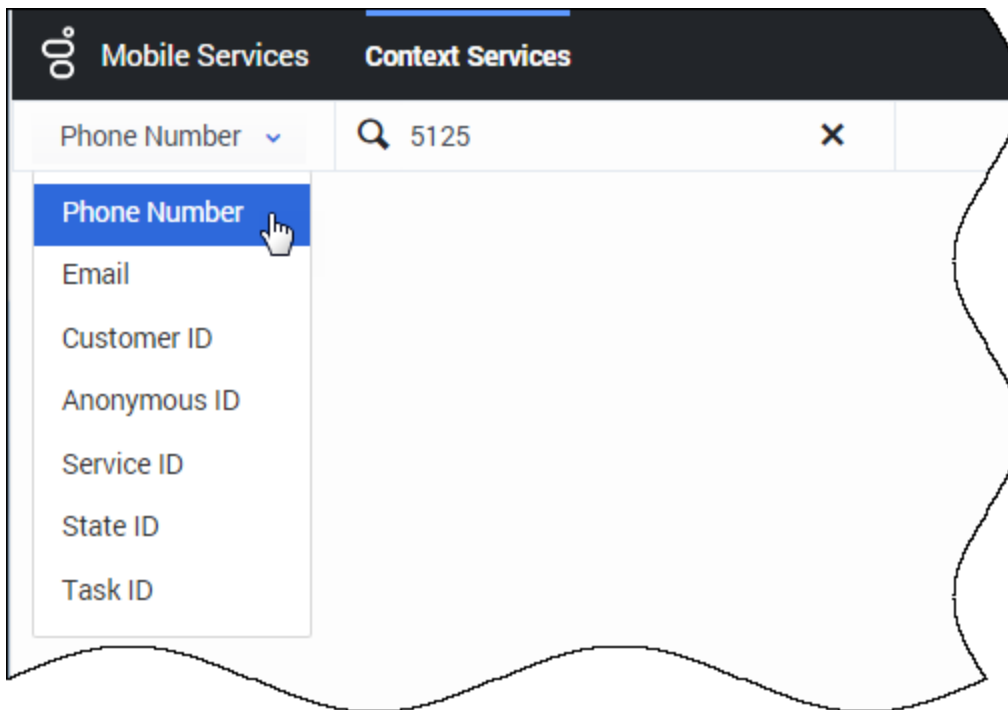

Login Panel

The Context Services Interface is available as part of the GMS Service Management User interface (detailed in the [Service Management Help](#)).

- To access this interface, you must login as a user who owns the [Administrator or Supervisor role](#).
- Then, you can select the Context Services icon.

Search for Services

First, you start by searching for services or customers in the Context Services panel. You can search for UCS keys or Service, State, and Task IDs. These fields must be identical to a key in the UCS database to work correctly. There is no automatic completion available.

Select a key in the Search drop-down menu, then enter a value in the Search text box. The value must match a UCS entry to provide a result.

The screenshot shows the 'Context Services' tab in the 'Mobile Services' interface. A search bar at the top contains '5125'. Below it, a modal titled 'Which Of these Customers are you referring to?' displays a table of customer records. A 'Cancel' button is at the bottom left.

Last Name	First Name	Phone	Email	Country	State	City	Language
Jones	Jane	5125, 6515559881, 6505559881	jones@demosrv.genesyslab.com	USA	IL	Smallville	Spanish
Jones	John	5125		USA	IL	Smallville	English
Jones	Billy	5125		USA	IL	Smallville	English
Thompson		5125					

The interface displays a list of results. Select an item in the list.

You can then use the interface to modify the service.

Manage your Services

The screenshot shows the 'Manage your Services' interface. It includes a search bar, a 'Sort by' dropdown set to 'Time Started', and a 'Latest First' dropdown. Below these are three columns: 'Services', 'States', and 'Tasks'. Annotations include: 'Filter the results' pointing to the search bar; 'Delete' pointing to a minus sign icon in the 'Services' column; 'Create new services, states or tasks' pointing to a plus sign icon in the 'Tasks' column; and a large bracket on the right side of the 'General Information' section with the text: 'General Information' updates with the current selection.

The interface lets you manage the list of objects that you selected. If you selected a customer instance, you get the complete list of objects associated with the Customer ID.

- You can use the sorting tools to change the list displayed.
- You can select an item in the list, and get more details about the object.
- You can delete an object by clicking the 'x' icons.
- You can use the Action menu to perform more actions, such as creating new services, states, tasks.
- You can add services, states, and tasks by clicking the '+' icons.

The screenshot displays the Context Services Interface. At the top, there is a search bar with '5125' and a 'Phone Number' dropdown. Below this is a 'Search' input field and a 'Sort by: Time Started' dropdown menu. The main content area is divided into three columns: 'Services' (containing 'BlueSky Flight Status' and 'BlueSky Book Flight'), 'States' (containing 'BlueSky Upsell' and 'BlueSky Confirmation'), and 'Tasks' (containing 'BlueSky LocDates To', 'BlueSky PickFlight Depart', and 'BlueSky LocDates From'). A hand-drawn arrow points from the 'HTTP Request History' button in the top right corner to the 'Display history' text, which then points to the 'HTTP Request History' section at the bottom of the interface.
