Running Test Scenarios

Important

From the 8.5.1 release of GRS, the Testing Scenarios feature is supported for rules based on the Conversation Manager standard template.

To run a test scenario (for which execute permission is needed), select a test scenario row and click **Run Test Scenario**.

To run all the test scenarios, click **Run All**.

When the tests are complete, a details view and a summary view are both displayed. The **Result** column will display either a pass  or a fail . Click on either the pass or the fail icon to bring up a detailed view of the test run.

In release 8.5.1, an additional level of detail is available, if configured, that shows all the conditions that were evaluated in arriving at the Pass/Fail decision for each linear rule or each row of a decision table. Click **Show Execution Log** to display this detail. Click **Hide Execution Log** to hide it. See **Test Scenario Results**.
