Importing and Exporting Rule Scenarios

Important

From the 8.5.1 release of GRS, the Testing Scenarios feature is supported for rules based on the Conversation Manager standard template.

You can import an individual test scenario from, or export to, an XLS format. This enables you to edit rows of test data inside a spreadsheet like Excel, or produce test suite data from another tool or source that can extract real customer data from an external database and build an XLS document.

To import from an external .XLS file:

1. On the toolbar, click **Import**.
2. Browse to the relevant file.
3. Click **Import**.

To export to an external .XLS file:

1. Select the test scenario for export.
2. Click to display the drop-down list.
3. Select **Export Test Scenario (.xls)**.
