Genesys Skills Management API Guide

Accessing API Reference Documentation

12/14/2025

Accessing API Reference Documentation

The documentation of various Genesys Skills Management APIs is available in a specific location where the PDNA application is hosted by your organization.

You can navigate to the API documentation by replacing <H0ST_NAME> in the `http://<H0ST_NAME>/api/swagger` URL with the host name where you have launched the PDNA application. An example API documentation URL will look like: http://pdna.skillsmanager.net/api/swagger

If you cannot access any API, check if you have all the requirements specified in prerequisites.

> ### Important
> Some methods can be accessed by a Landlord or Tenant only.
