Genesys Skills Management Automated Install and Upgrade Guide

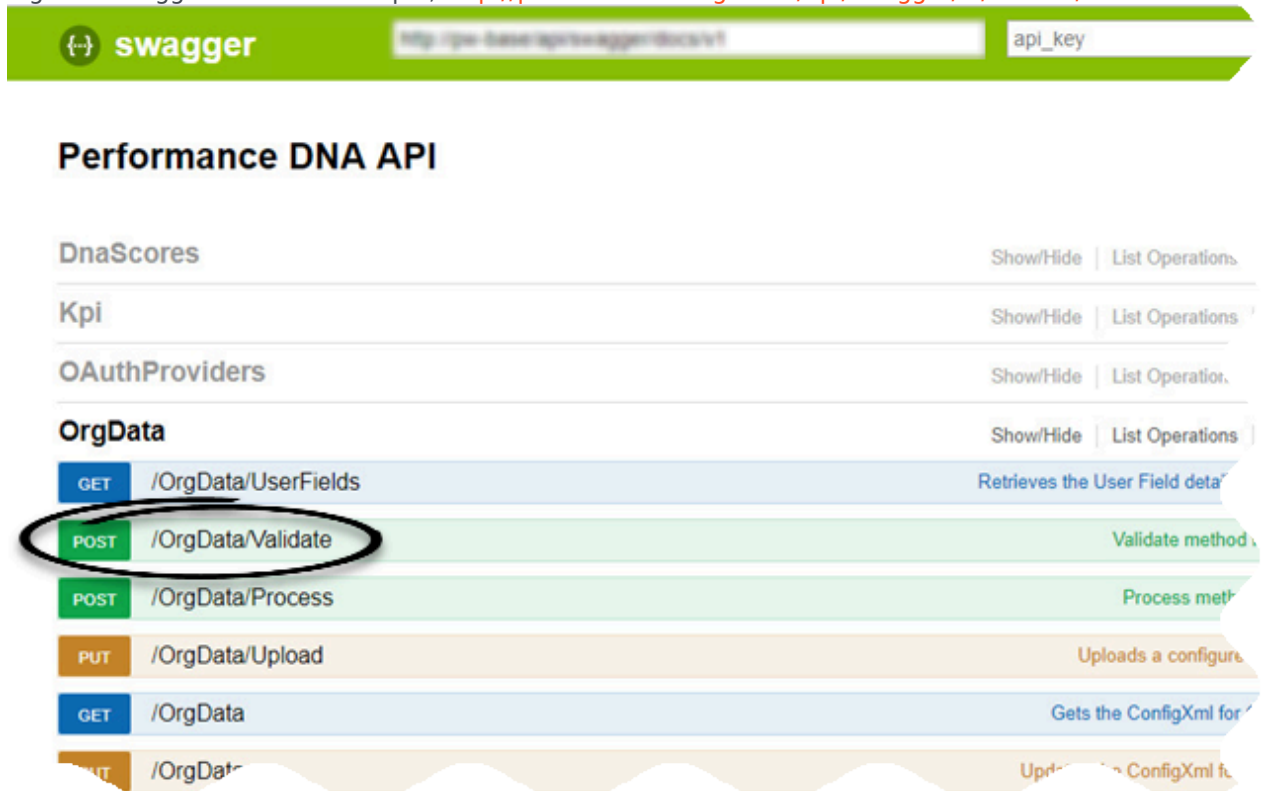

Validating OrgData Configuration

5/8/2025

Validating OrgData Configuration

You can validate your current OrgData configuration by running the following procedure.

1. Login to Swagger URL. For example, <http://pdna.skillsmanager.net/api/swagger/ui/index#/>

2. Click and expand OrgData API set.
3. Click **/OrgData/Validate** POST method.
4. Click **Try it Out!** to run the validation. This will run the validation and display the results.
 - If you receive a *Response Class (Status 200)*, your OrgData configuration is valid.
 - If you receive a *Response Class (Status 400)*, your OrgData configuration is invalid.
5. Check the **Response Body** section for other validation errors and modify the **OrgData Setup** settings accordingly to correct the configuration.

Tip

Genesys recommends to batch the information that is sent to the API for validation. The Tenant Landlord can configure this batch size in the **Validate User Field Batch**

Size field on the **System > Global Settings** page.
