API Events

API Events

Once you've registered your own plugin on the bus, you can subscribe and listen for published events. Below we'll quickly register a new plugin on the bus using the global bus object.

Important

The global bus object is a debug tool. When implementing Widgets on your own site, do not use the global bus object to register your custom plugins. Instead, see [Widgets Extensions](#) for more information about extending Genesys Widgets.

```
var oMyPlugin = window._genesys.widgets.bus.registerPlugin('MyPlugin');  
oMyPlugin.subscribe('CallBack.ready', function(e){});
```

Name	Description	Data
opened	The Callback widget has appeared on screen	n/a
ready	Callback is initialized and ready to accept commands	n/a
closed	The Callback widget has been removed from the screen	n/a
