Web Services API Reference

Create Setting

Create Setting

This operation is part of the User Settings API section of the Web Services API.

Overview

Creates a new setting in the specified group.

| Request URL | /users/{id}/settings/{group-name} or /me/settings/{group-name} |
|-------------------|--|
| HTTP Method | POST |
| Required Features | api-provisioning-write |

Parameters

| Parameter | Value |
|-------------|--|
| <key></key> | Specify the "key" attribute defined for the setting. If the "key" attribute was not specified when the setting was created, you should use the "name" attribute. |
| value | The value of the setting. |

Samples

Request

```
POST /me/settings/my-setting-group
{
    "name": "My Third Setting",
    "value": "purple"
}
```

HTTP Response

```
{
  "statusCode": 0
}
```
