# Web Services API Reference

Complete

12/14/2025

# Complete

This operation is part of the [Facebook API](#) section of the [Web Services API](#).

## Overview

Marks a Facebook interaction as completed. If the **queuePath** parameter is specified, then the Facebook interaction is placed in the specified queue.

|                          |                          |
|--------------------------|--------------------------|
| <b>Request URL</b>       | /api/v2/me/facebook/{id} |
| <b>HTTP Method</b>       | POST                     |
| <b>Required Features</b> | api-multimedia           |

## Parameters

| Parameter     | Value                                                                                                                                                                                    |
|---------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| operationName | Complete                                                                                                                                                                                 |
| queuePath     | The URI of the queue where Web Services should place this Facebook interaction. (optional)                                                                                               |
| saveLAR       | Possible values are true or false. If true, information about the agent performing the operation is set in the Contact Profile so that it can be used for last agent routing. (optional) |

## Samples

### Request

```
POST api/v2/me/facebook/01QG4HAN88NP400N
{
  "operationName": "Complete",
  "queuePath": "/contacts/60ebbb94-3cef-4b14-95f8-5c49dbeb355d"
}
```

### HTTP Response

```
{
  "statusCode": 0,
  "referenceId": 45
}
```

## CometD Response

```
