Interaction Concentrator Physical Data Model for a PostgreSQL Database

Table GC_ENDPOINT

Table GC_ENDPOINT

This table stores configuration information about endpoints, including DNs, scripts, and agent places.

Tip

To assist you in preparing supplementary documentation, click the following link to download a comma-separated text file containing information such as the data types and descriptions for all columns in this table: [Download a CSV file](#).

Hint: For easiest viewing, open the downloaded CSV file in Excel and adjust settings for column widths, text wrapping, and so on as desired. Depending on your browser and other system settings, you might need to save the file to your desktop first.

Column List

Legend

Column	Data Type	P	M	F	Description
ID	integer	X	X		The DBID of the DN object. This is the primary key.
DN	varchar(255)		X		The directory number.
Type	integer		X		The type of the DN. This corresponds to the CfgDNType enumeration IN Configuration Server. For a listing of permissible values, refer to G_Dictionary Values (for DB2 , Microsoft SQL Server , Oracle , or PostgreSQL , respectively).
