Workspace Desktop Edition Deployment Guide

Non-ClickOnce Deployment Prerequisites

5/11/2025

Non-ClickOnce Deployment Prerequisites

Contents

- [1 Non-ClickOnce Deployment Prerequisites](#)
 - [1.1 Mass Deployment of .NET Framework](#)

A non-ClickOnce deployment does not give you the advantages of managing updates to privileges, permissions, or software upgrades. A non-ClickOnce deployment is done typically for testing or development purposes where the agent workstation is not in a production environment. Only the Interaction Workspace application is installed on the client workstation.

Interaction Workspace runs on the following client-side operating systems: Windows XP, Vista, 2003, or 2008. The workstation must have the .NET Framework 3.5, SP 1 installed. The following browsers are supported: Microsoft Internet Explorer 6, 7, and 8; and Mozilla Firefox 2 and 3.

Note: Other browsers, such as Safari, Opera, and Chrome are not officially supported and might not function correctly.

Mass Deployment of .NET Framework

If you do not have the .NET Framework installed on all of your client workstation, you can use the procedures found on the Microsoft Developer Network to perform a mass deployment.
