Contact History

[**Modified:** 8.5.110.13, 8.5.112.08, 8.5.113.11, 8.5.115.17, 8.5.117.18]

Tip

Are you looking for **tutorials** to help you learn how to use this feature? Check out the [Related Resources](#) section at the bottom of this article.

The **Contact History** view enables you to access and manage previous interactions with a contact that you have selected from the [Contact Directory](#) or from the [Information view](#) of the current [voice](#), [chat](#), [email](#), or [workitem](#) interaction.

The screenshot displays the 'Contact History' view. At the top, there are tabs for 'Information' and 'History'. Below the tabs, there's a filter section with a 'Filter' dropdown and a 'Quick search' input field. A timeline slider shows 'Arch.', 'All', '1M', '1W', and '1D'. Below the timeline are icons for email, voice, and other media. The main area is a table of interactions with columns for 'Status', 'Subject', and 'Star'. The first row is highlighted in blue, showing 'In Progress' status, 'Shipment arrived broken' subject, and a date of 4/1/2014. Below the table, there's a pagination bar showing 'Page 1 of 1', '1 - 5 of 5', and '10 per page'. At the bottom, there's a 'Details' section for the selected interaction, showing the email content: 'Hello, I just received my shipment and it arrived broken. My order number is 2403570348030'.

If you are reviewing the **Contact History** tab in the **current interaction view**, the current interaction is highlighted in the **History** view if your administrator has enabled this feature. [Added: 8.5.117.18]

Use the **Contact History** view to do the following:

- Find interactions for the current contact or the **currently selected contact**.
- Perform the following **actions** on selected interactions:
 - **Mark Done** voice and email [Added: 8.5.110.13] interactions if the status is **In-Progress**.
 - **Change Contact** for the selected interaction if the status is **In-Progress** (not supported for all media types).
 - **Reply** or Reply All to email interactions.
 - **Resend a previously sent email**.
 - **Open in-progress** inbound and outbound email interactions (that are in the process of being routed

out of and into workbins and queues) and **workitems**.

- **Forward** inbound and outbound email interactions (that are marked as Done). [**Added:** 8.5.113.11]
- **Delete** an outbound email interaction if the status is **In-Progress**. [**Added:** 8.5.110.13].
- **Print the interaction** (if your account has the correct permissions).
- **View information** about the selected interaction.

Finding Interactions

Interactions are stored with various attributes. You can use these attributes to find specific interactions. Search results are shown in the Interactions table. You can review, **filter**, and perform **actions** on the interactions that you select. Your administrator might configure your system to restrict your search results.

Quick Search

The Quick Search enables you to search for any attribute that begins with the criteria you enter. For example, you could search for a disposition code of "Transferred" or find all interactions that are related to the subject of "billing".

To search the contact history, enter into the **Quick Search** field the attribute value for which you are searching. Quick Search is a *contains* keyword search.

A rectangular input field with a light blue border. Inside the field, the text "Quick search" is written in a light blue font. To the right of the text, there is a small magnifying glass icon.

Click the magnifying glass to search for the value that you have entered. Click the **X** to clear the **Quick Search** field.

Advanced Search

Click the **Show/Hide Advanced Search** () toggle button to show or hide the advanced search feature.

The Advanced Search feature enables you to use multiple criteria to refine your search. The **Advanced Search** pane contains drop-down lists of search criteria, such as Status, Subject, Start Date, and End Date.

From the column of search modifiers to the right of the attribute column, choose how the search string should be considered.

Menus for pre-defined fields, such as Status, contain the pre-defined field names from the database — for example, **All**, **Done**, and **In-Progress**.

Menus for date fields contain the following choices:

- **On:** The exact date.
- **On or after:** The specified date or any date after.

- **Before:** Before the specified date.

Menus for text fields contain the following choices:

- **Contains:** The specified text string occurs anywhere in the selected criterion.
- **Begins With:** The specified text string occurs at the beginning of the selected criterion.
- **Is:** The specified text string exactly matches the criterion.

Enter the search value in the text field on the right side. If your criterion is a start date or end date, use the calendar pop-up window to specify the date.

Use the **Match Conditions** options to specify whether **All** or **Any** of the search conditions that you have specified are applied.

To search based on the Start Date, use the **Calendar** button (📅) to select a date, or enter the date in the format that conforms to your local day and time display preferences.

☒ Match All Conditions ☐ Match Any Condition

Status	All	✕
Start Date	On	<input type="text"/> 📅 ✕
End Date	On	<input type="text"/> 📅 ✕

Add Condition ▾ Search

Tip

Your administrator configures the default search criteria for this view; however, you can add or remove search criteria as needed. Workspace remembers the last search criteria that you used and displays these when you use the Advanced Search feature again. [**Added:** 8.5.112.08]

Filtering

The **Contact History** view filtering controls enable you to refine your search. The chronology slider enables you to search the contact history by time interval.

The slider has five positions that represent different time intervals:

- **Arch.:** Search the database for messages that have been archived
- **All:** Search the entire database from the most recent interaction back to the earliest interaction

- **1M**: Search the database from the most recent interaction back to one month ago
- **1W**: Search the database from the most recent interaction back to one week ago
- **1D**: Search the database from the most recent interaction back to one day ago

The Interaction Type filters enable you to select and deselect the types of interactions that are to be searched. The items that are displayed depend on the interaction types that you are configured to handle. Click the **Filter** menu to select the interaction types that you want to search. You can select multiple items in the **Filter** menu. The following types are available, by default:

- Show all Interactions
- Show voice Interactions
- Show email Interactions
- Show chat Interactions
- Show SMS Interactions
- Show Other Media Interactions

When a filter is on, a check mark appears next to it in the **Filter** menu.

Your administrator might have configured additional customized options for the **Filter** menu, such as business area/department (for example: accounts, sales, and service) or customer level (for example: Silver, Gold, and Platinum). Custom filters enable you to refine your search. For example, if you are seeking email interactions about a service request, you can make two selections in the **Filter** menu to refine your search: **Show email Interactions** and **Show Interactions with Service Department**.

Grid View and Tree View

Workspace enables you to review contact interactions either chronologically or as threads. The **Show Interactions in Grid View/Show Interactions in Tree View** buttons ( ) enables you to specify how the **Contact History** view is displayed.

Grid View displays interactions chronologically, and Tree View displays the interactions chronologically by thread. A thread is a group of two or more interactions with a single contact that were created in the same context (email replies, multichannel conversation, social-media threads, and so on).

Both the Grid and Tree views have columns that contain information about each interaction. Depending on how your system is configured, columns might include **From**, **Subject**, **Status**, **Start Date**, **End Date**, or custom attributes that are assigned by your administrator. Depending on your system configuration, interaction status might include the following states:

- Done
- In-progress
- Assigned to <agent> in <name> workbin
- Assigned to <name> Place in <name> workbin
- In shared workbin <name>

- Assigned to <agent> Actively Handling
- Delivery in-progress
- In a queue

Page Controls

Page through the list of search results by doing any of the following:

- Click the **Go to the Next Page** button (▶) to access the next page.
- Click the **Go to the Previous Page** button (◀) to return to the previous page.
- Click the **Go to First Page** button (◀◀) to return to the start of the list of search results.
- Click the **Go to Last Page** button (▶▶) to return to the start of the list of search results.
- Specify the number of items that are displayed on each page by using the **per page** drop-down list.

Reviewing Search Results

The search results are displayed in the interactions table. The search result table is not sortable. To sort the interactions table, clear the search field to display the full history set.

Actions

Workspace enables you to perform actions on interactions that you have selected in the interactions table. You must be configured to perform contact management by your system administrator.

Actions that you might be configured for include the following:

- **Marking Done** (voice and email [**Added:** 8.5.110.13] interactions)
- **Change Contact**
- **Replying/Replying All** (email interactions)
- **Resending a previously sent email**
- **Opening in-progress email interactions**
- **Review attachments** [**Added:** 8.5.115.17]
- **Forward** inbound and outbound email interactions [**Added:** 8.5.113.11]
- **Delete an outbound email interaction** [**Added:** 8.5.110.13]
- **Print the interaction**

Completing Interactions

To complete a voice or email [**Added:** 8.5.110.13] interaction with the status of In-Progress, select it in the Interactions table and click **Done** (☑). The status of the interaction changes to **Done**.

Changing Contact

To assign a voice interaction with the status of In-Progress to a different contact, select it in the Interactions table, and click **Change Contact**. In the Change Contact window, select a new contact and click **Merge**.

Reply or Reply All

Reply () or **Reply All** () to an email interaction.

Resending a Previously Sent Email

If you select an outbound email interaction in the **Contact History** view that is in the **Done** state, the **Resend** button () is displayed if you are configured to resend outbound emails that have already been sent.

Click **Resend** to open the previous outbound email interaction in a new outbound Email Interaction window. The contents of the previous email interaction are copied into the body of your new email interaction, and the recipients are copied into the recipient list of the outbound Email Interaction window.

Opening In-Progress Email Interactions

If the status of an email interaction in the **Contact History** view is in one of the in-progress states, when you select the interaction, the **Open** button () is displayed (if the email is in a queue, a workbin, or in routing (including outbound in-progress emails)). Click **Open** to open the email interaction in the current active interaction window or in a new Email Interaction window if you are opening the email from the Main Window or Gadget **Contact History** view.

After you pull the in-progress email interaction, you can read or handle it as an **inbound email interaction** or an **outbound email interaction**.

You can also click **Put back in original location** () to return the email interaction back to the In-Progress workbin or into a queue.

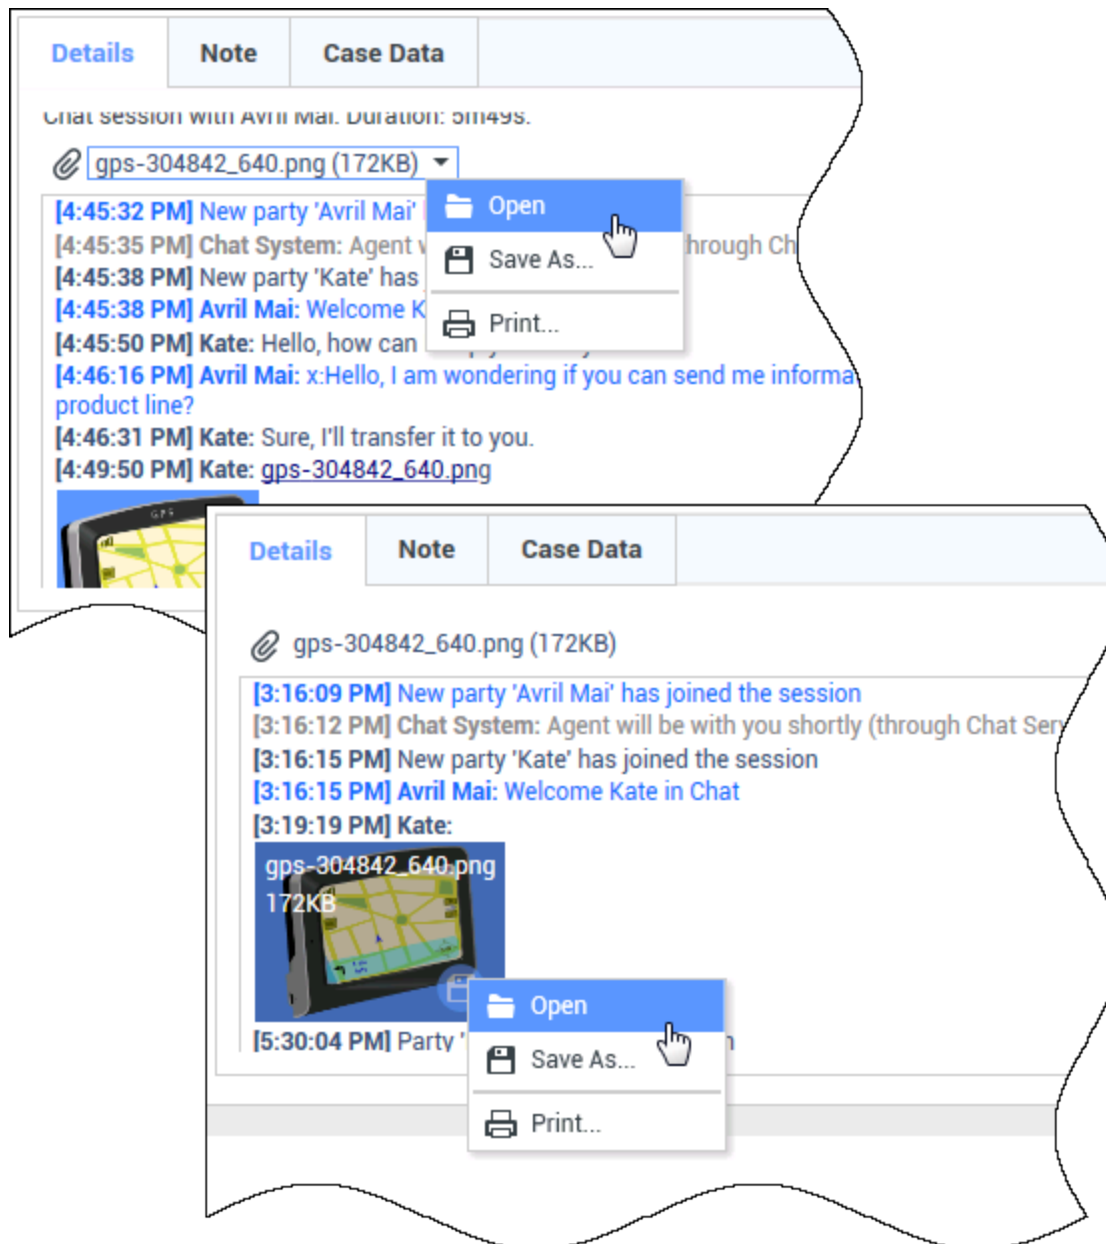

Reviewing Attachments

[Added: 8.5.115.17]

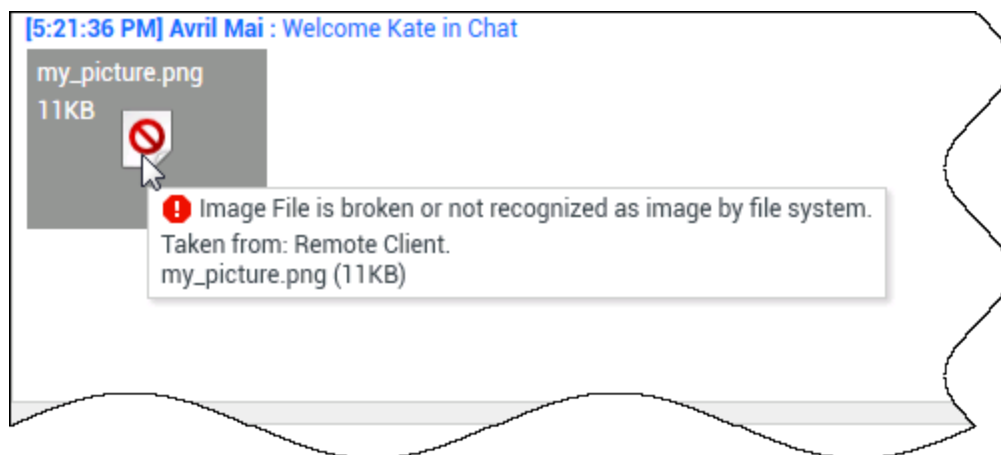

Both email and chat interactions might have file attachments. You might be allowed to open, save, or print files that are attached to interactions.

If you double-click it you can open it. If you click the save button you might be able to save the file to your workstation or network.

If you right-click the thumbnail/icon, a menu is displayed that might allow you to open, save, or print the file. If more than one file has been transferred, you have the opportunity to save the one that you clicked on, or save all (including the files that you have transferred).

If there is a problem with the transferred file, the following icon and tooltip are displayed. You might have to request that the sender check that they sent the correct file and then ask him or her to resend it. If you transferred the file, you should check that you sent the correct file and then resend it to the contact.

Forward

[Added: 8.5.113.11]

If the status of an email interaction in the **Contact History** view is **Done**, when you select the interaction, the **Forward** button (📧) is displayed. Click **Forward** to open a new outbound email interaction that includes the selected interaction in the **Forward interaction window**.

If you are not ready to send the forwarded email interaction, you can click **Save in Workbin** (📁) to store the email to be forwarded in the Draft workbin. Open this draft interaction when you are ready to work on it again or to send it.

Delete

To delete a selected outbound email interaction with the **In-Progress** status, click **Delete** (🗑️) [Added: 8.5.110.13]

Tip

If you accidentally delete an email, ask your administrator about recovering the email from the database backup.

Printing Email Interactions

[Added: 8.5.101.14]

If you have the correct permissions, click **Print** (🖨️) to open the **Print Preview window** and print the selected interaction.

About the Selected Interaction

Workspace enables you to review information details about interactions that you have selected in the **Contact History** view. The **Show Details Panel on Bottom/Hide Details Panel** button () enables you to specify how the Details panel is displayed. Click the **Show Details Panel on Bottom/Hide Details Panel** button to choose one of the following views:

- To display the **Details** panel to the right of the workspace area, click **Show Details on Right** ()
- To display the **Details** panel below the workspace area, click **Show Details Panel on Bottom** ()
- To hide the **Details** panel, click **Hide Details Panel** ()

The Details panel contains the following three tabs:

- **Details**
- **Note**
- **Case Data**

Details

The **Details** tab might display information such as the following:

- Phone number
- To and from email addresses
- Origin of the call — for example, the name of the agent who transferred the call (this information is stored in the **Note** tab).
- Time: Elapsed time between the interaction **connected event** and the **markdone** event by the agent or the system.
- Timestamp
- Chat transcript
- Name of the contact

Note

The **Note** is a feature that enables you to enter comments about the current interaction or read comments that have been entered in the past. The comments are stored as a part of the history for the contact. The contents of the Note are available to any agent who accesses the contact's history.

Case Data

Case Data (attached data) provides information — such as an account number, type of service, and disposition — about an interaction. Your system administrator configures which attached data is displayed.
