Installing the iWD GAX Plugin

Contents

- 1 Installing the iWD GAX Plugin
 - 1.1 Notes on Localization
 - 1.2 Note on Removing the iWD GAX Plug-in
 - 1.3 Note on Installing/Removing Language Pack Plug-ins
 - 1.4 Upgrading Plug-ins from 8.5.0 to 8.5.1+

iWD GAX Plugin is installed in the GAX standard way - the procedure is described [here](#) (opens a new document).

Important

Before any install of the GAX Plug-in, if you have installed it previously you must perform the removal procedure below to ensure a clean installation.

Notes on Localization

- The base GAX application and its plugins (including iWD GAX plug-in) are not fully separated with their localization.
- All localization packages of all supported plugins and the GAX base localization package should be installed together.
- All installed localization packages should contain the same set of languages.

Note on Removing the iWD GAX Plug-in

Important

If you perform the **GAX Plug-in removal procedure** for the iWD GAX Plug-in, you need to make sure that following files have been deleted (if you are working on Windows, some of these files might be already removed by the generic Windows uninstaller):

- <GAX_HOME>/webapp/WEB-INF/lib/gax-iwd.jar file
- <GAX_HOME>/plug-ins/gax-iwd.jar file
- <GAX_HOME>/webapp/plugins/gax-iwd directory

Note on Installing/Removing Language Pack Plug-ins

Important

Before you perform the **Installing Language Packs** procedure for any iWD GAX

Plug-in language upgrade or after you perform the **GAX Plug-in removal procedure** procedure for Language Pack removal, you need to make sure that following files have been deleted:

- `<GAX_HOME>/webapp/WEB-INF/lib/gax-iwd-lp-<lang-build>.jar` (for example, `gax-iwd-lp-de-de-8.5.100.02.jar` file -this should be removed by iWD GAX language pack uninstaller).
- `<GAX_HOME>/plug-ins/gax-iwd-lp-<lang-build>.jar` (for example, `gax-iwd-lp-de-de-8.5.100.02.jar` file).
- `<GAX_HOME>/webapp/plugins/gax-iwd-lp-<lang>` (for example, `gax-iwd-lp-de-de` directory).

Upgrading Plug-ins from 8.5.0 to 8.5.1+

To upgrade any plug-in, you need to follow the instructions above to remove the old plug-in, then install the new one.
