## Contents

- 1 Overview of the CMS User Interface
  - 1.1 Login into the CMS
  - 1.2 Inside the CMS

# Overview of the CMS User Interface

This chapter describes general principles of the CMS UI organization as well as such general functions as login/logout, getting help, navigating between different views, and so on.

## Login into the CMS

When you enter the CMS URL in your browser, the first page you will see is the login screen:

Enter your login and password in the dedicated boxes and hit the **Log In** button.

**Note:** To login to the CMS you need to have at least one of the knowledge privileges assigned (author, approver and/or administrator).

## Inside the CMS

### Dashboard

Once you've logged in to the CMS the Knowledge Dashboard displays the summary of the knowledge authored in the CMS.

## Page Elements

Let's review some of the major navigation elements available on the page.

### Tip

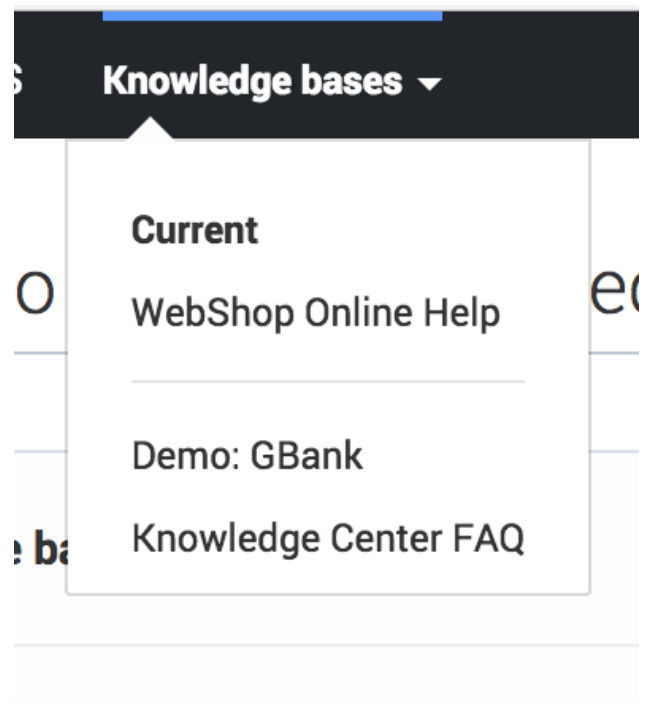

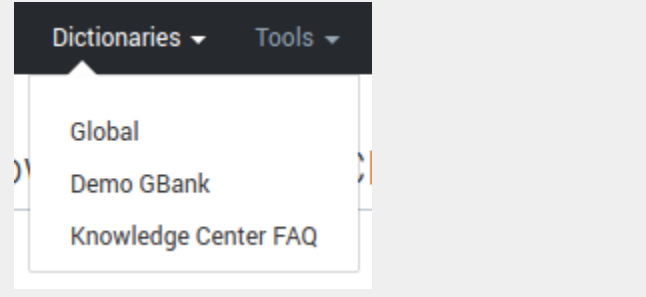

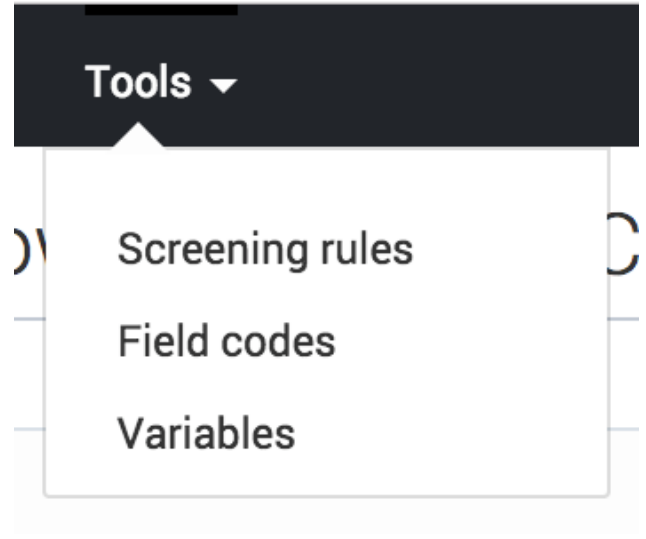

Click any of the images below to enlarge them

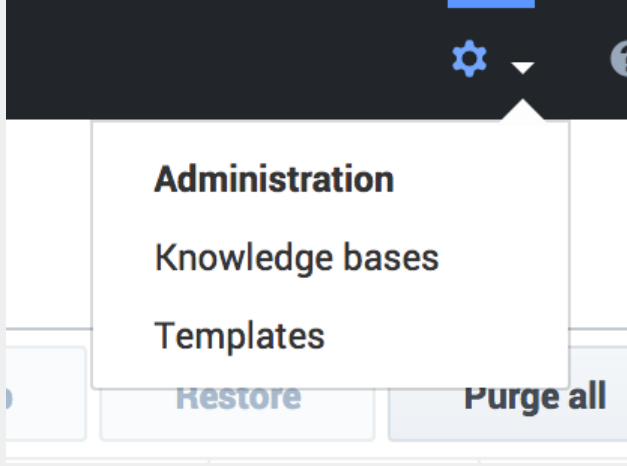

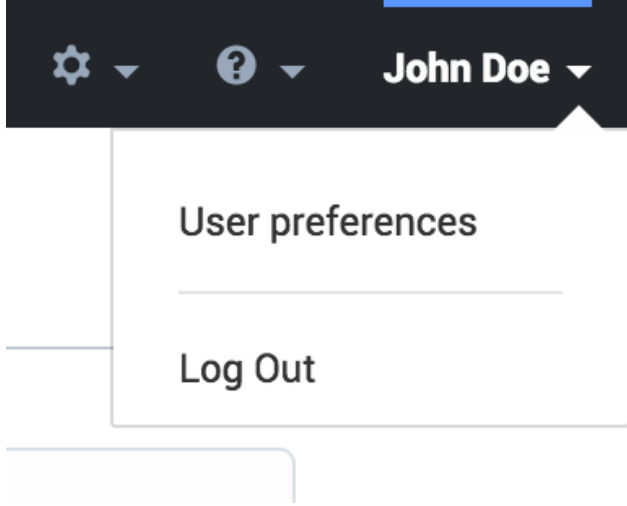

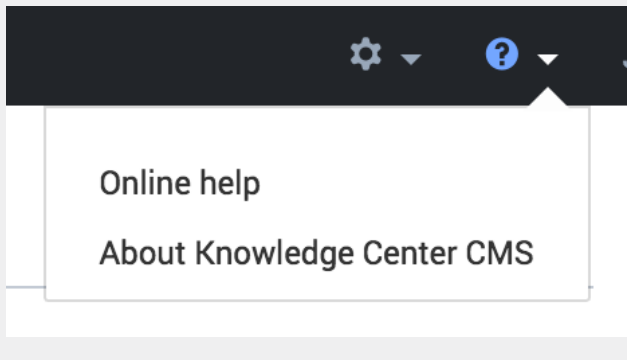

The top-most line is the main menu line providing you access to the functional areas of the product:

This main menu includes the following elements:

 <b>Genesys Knowledge Center CMS</b>	<b>Product name:</b> clicking this area will always bring you back to the Knowledge Dashboard.
---	--

	<p><b>Knowledge base menu:</b> brings you to the authoring area within one of the knowledge bases. This is the area that is used by the knowledge workers (authors) and knowledge managers (approvers). Clicking this area will open a drop down list displaying the current knowledge base (just below "Current" label) as well as the list of all available knowledge bases (below the separation line). Clicking on one of the listed knowledge bases will bring you to the document authoring view for that knowledge base.</p>
	<p><b>Dictionaries menu:</b> Provides a shortcut to access dictionaries. You need Administrator privileges to be able to access this area. There is a Global dictionary that affects all knowledge bases and one per knowledge base. Dictionaries are automatically created and cannot be deleted. Clicking on an existing dictionary in the drop-down menu will open that specific dictionary management view.</p>
	<p><b>Tools menu:</b> allows you to manage Variables. You need Administrator privileges to be able to access this area. Clicking on this area will open a drop-down menu with the different objects to edit. Select one from the list and the authoring area of the selected object opens.</p>

 A screenshot of the CMS user interface showing the 'Administration' menu. The menu is open, displaying 'Administration', 'Knowledge bases', and 'Templates'. Below the menu, there are buttons for 'Restore' and 'Purge all'.	<p><b>Administration menu:</b> opens the administrator area where knowledge administrators can create new knowledge bases, document templates, modify properties of existing ones, and do other administrative actions. Click the gear icon and then select Knowledge Bases or Templates from drop down menu.</p>
 A screenshot of the CMS user interface showing the 'Personal' menu. The menu is open, displaying 'User preferences' and 'Log Out'. The user's name 'John Doe' is visible in the top right corner of the header.	<p><b>Personal menu:</b> the last element in the main menu indicates the name of the user who is currently logged in, and also allows that user to change user preferences and logout from the system.</p>
 A screenshot of the CMS user interface showing the 'Help' menu. The menu is open, displaying 'Online help' and 'About Knowledge Center CMS'. The user's name 'John Doe' is visible in the top right corner of the header.	<p><b>Help menu:</b> provides easy access to the contextual and online help documentation of the Knowledge Center CMS as well as the "About" window.</p> <p>When you click the question mark in the main menu, the Contextual Help widget opens. The Contextual Help widget displays help content that is relevant to the particular place you are in, in the application.</p> <p>If you click on the down arrow beside the question mark a drop-down list displays where you can navigate to the online help (opened in a new browser window or tab) or display the "About" window of the Knowledge Center CRM.</p>

Clicking on the elements of the Knowledge base menu or Administration menu will lead you to the working area of the product (for example, document authoring):

## Overview of the CMS User Interface

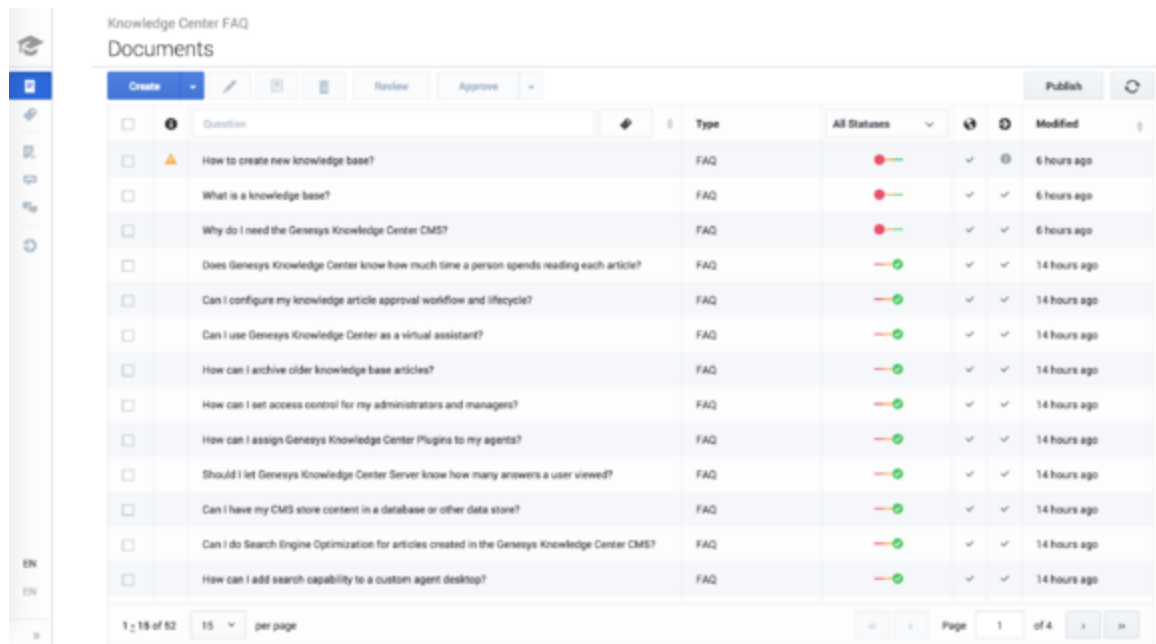

On the left side, there is a sidebar menu that helps you navigate within the authoring area. While an in-depth review of each element is covered in the authoring manual, let's go through the general principles:

The top line of the sidebar is dedicated to the visual indication of the area that you are in:

- If you see a graduation hat icon and the knowledge base name, you are in the authoring area
- If you see the gears icon, you are in the administration area

At the very bottom of the sidebar, there is an element that allows you to expand or collapse the sidebar. Collapsing the sidebar leaves more space for the main area:

The screenshot shows the 'Knowledge Center FAQ Documents' interface. It features a sidebar on the left with navigation icons and a main table area. The table has columns for 'Question', 'Type', 'All Statuses', and 'Modified'. The 'Question' column contains 15 FAQ entries, each with a checkbox and a status indicator (a red dot with a green checkmark). The 'Type' column for all entries is 'FAQ'. The 'All Statuses' column shows a red dot with a green checkmark. The 'Modified' column shows the time since the document was last modified, ranging from '6 hours ago' to '14 hours ago'. At the bottom of the table, there is a pagination bar showing '1 of 15 of 62' items, '15' items per page, and 'Page 1 of 4'.

Question	Type	All Statuses	Modified
<input type="checkbox"/> How to create new knowledge base?	FAQ	●	6 hours ago
<input type="checkbox"/> What is a knowledge base?	FAQ	●	6 hours ago
<input type="checkbox"/> Why do I need the Genesys Knowledge Center CMS?	FAQ	●	6 hours ago
<input type="checkbox"/> Does Genesys Knowledge Center know how much time a person spends reading each article?	FAQ	●	14 hours ago
<input type="checkbox"/> Can I configure my knowledge article approval workflow and lifecycle?	FAQ	●	14 hours ago
<input type="checkbox"/> Can I use Genesys Knowledge Center as a virtual assistant?	FAQ	●	14 hours ago
<input type="checkbox"/> How can I archive older knowledge base articles?	FAQ	●	14 hours ago
<input type="checkbox"/> How can I set access control for my administrators and managers?	FAQ	●	14 hours ago
<input type="checkbox"/> How can I assign Genesys Knowledge Center Plugins to my agents?	FAQ	●	14 hours ago
<input type="checkbox"/> Should I let Genesys Knowledge Center Server know how many answers a user viewed?	FAQ	●	14 hours ago
<input type="checkbox"/> Can I have my CMS store content in a database or other data store?	FAQ	●	14 hours ago
<input type="checkbox"/> Can I do Search Engine Optimization for articles created in the Genesys Knowledge Center CMS?	FAQ	●	14 hours ago
<input type="checkbox"/> How can I add search capability to a custom agent desktop?	FAQ	●	14 hours ago

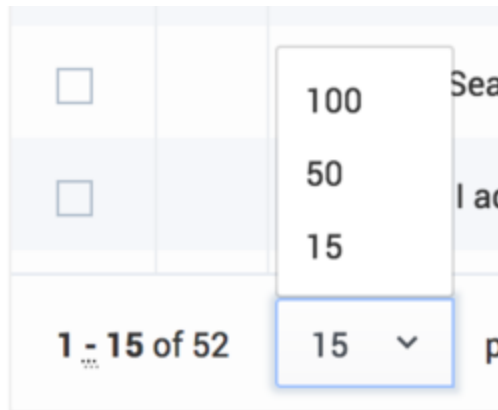

The main area is the one where all the work happens. There are two main types of the main area views:

- Table view (as shown above) - displays multiple elements (documents, categories, knowledge bases, and so on) with some summary information.
- Element view - displays a particular element.

Within table view you have:

- The knowledge base name (if the sidebar is collapsed)
- Sub-area name (for example, Documents, Categories, Knowledge Bases)
- Toolbar with action buttons
- Table view itself
- Table view navigation:
  - Number of elements per table page:

- Navigation between pages:
