Performance DNA KPI Upload Application Guide

Installing Data Uploader

12/15/2025

Installing Data Uploader

You do not have to install the **Data Uploader** application explicitly. All you must do is, simply copy the Apps.DataUploader folder from the release package to the relevant machine where you want to run the application.

You can then run and configure the application from that location to import **KPI data** or **OrgData** by referring their procedures.
