# Genesys Engage cloud Administrator's Guide

Installing and Configuring Agent Desktop (v8) with Salesforce Console

# Installing and Configuring Agent Desktop (v8) with Salesforce Console

## Contents

- **1 Installing and Configuring Agent Desktop (v8) with Salesforce Console**
  - 1.1 Installing Agent Desktop in Salesforce
  - 1.2 Configuring Salesforce for Agent Desktop
  - 1.3 Configuring the Whitelist Domain for your Salesforce Console
  - 1.4 Configuring Screen Pops in Salesforce

Complete the procedures on this page to install and configure Agent Desktop (v8) in Salesforce Console.

### Installing Agent Desktop in Salesforce

1. Open the following URL to install the latest Genesys Gplus Adapter (v8) for Salesforce package (this package is used for both the Agent Desktop and the Gplus Adapter) in Salesforce:  
<https://login.salesforce.com/package/installPackage.apexp?p0=04to00000000C3VD>  
If you're not logged in, Salesforce prompts for your username and password.
2. Now you should see the **Install Genesys Gplus Adapter for Salesforce** page. Select an installation type. Generally, you should select **Grant access to all users**, but if you want to limit access to Agent Desktop to specific profiles, then you can choose **Install for Specific Profiles ...**. Click **Install**.

3. When you see the "Installation Complete!" message, click **Done**.

## Install Genesys Gplus Adapter for Salesforce

By Genesys

Installation Complete!

Done

App Name	Publisher	Version Name	Version Number
Genesys Gplus Adapter for Salesforce	Genesys	Gplus for Salesforce	1.3

### Description

Genesys Gplus Adapter for Salesforce integrated directly within Salesforce CRM, the Gplus Adapter provides Salesforce users with a unified desktop to manage both customer information and interaction controls.

You should be redirected to the **Installed Packages** page, with "Genesys Gplus for Salesforce" included in the list.

## Installed Packages

Help for this Page ?

On Force.com AppExchange you can browse, test drive, download, and install pre-built apps and components right into your salesforce.com environment. [Learn More about Installing Packages](#).

Apps and components are installed in packages. Any custom apps, tabs, and custom objects are initially marked as "In Development" and are not deployed to your users. This allows you to test and customize before deploying. You can deploy the components individually using the other features in setup or as a group by clicking Deploy.

Depending on the links next to an installed package, you can take different actions from this page.

To remove a package, click **Uninstall**. To manage your package licenses, click **Manage Licenses**.

### Installed Packages

Action	Package Name	Publisher	Version Number	Namespace Prefix	Install Date	Limits	Apps	Tabs	Objects
Uninstall	<a href="#">Genesys Gplus for Salesforce</a>	Genesys	1.3	g_gplus	06/08/2015 1:17 PM		0	0	0

### Uninstalled Packages

## Configuring Salesforce for Agent Desktop

Complete this procedure to define your call center in Salesforce. The call center was created when you installed the Gplus Adapter for Salesforce package as part of [Installing Agent Desktop in Salesforce](#).

### Warning

If no CRM is specified, screen pop and other integration features will be inactive.

1. If you haven't already, login to Salesforce and go to **Setup > Build > Customize > Call Center > Call Centers**. Or, you can search for "Call Centers" in the **Search All Setup** field and select the "Call Centers" result. You should see the **Introducing Salesforce CRM Call Center** page. **Note:** You must have administrator privileges.
2. You can select **Don't show me this page again** if you want to hide the page in the future, and click **Continue**.
3. On the **All Call Centers** page, click **Edit** next to the Genesys Gplus for Salesforce entry.
4. In the **CTI Adapter URL** field, replace the text with the following URL:

```
https://''GWS_HOST:GWS_PORT''/ui/crm-workspace/index.html
```

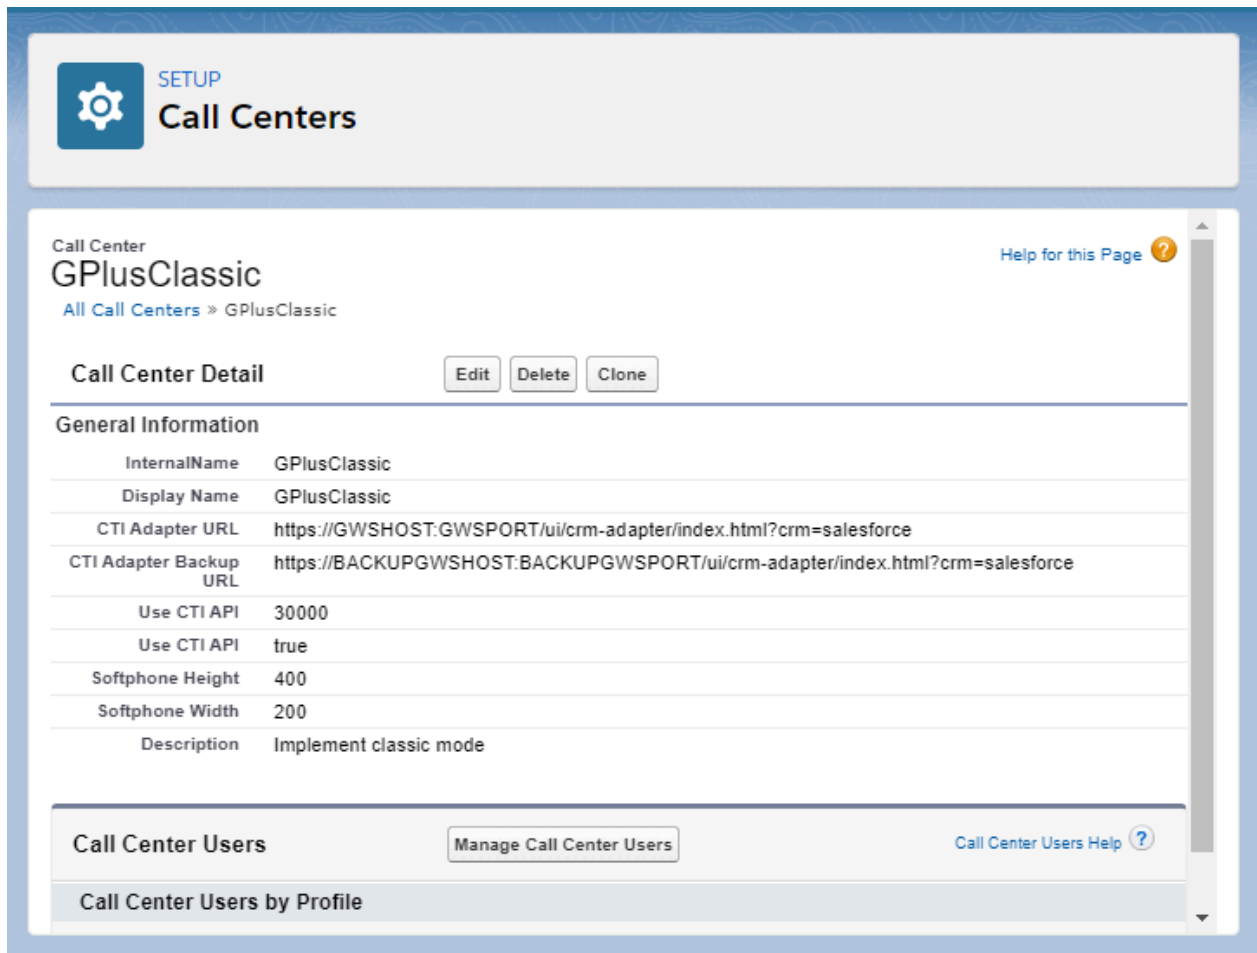

You'll need to change *GWS\_HOST:GWS\_PORT* to the correct host and port provided by Genesys. For example:

```
https://198.51.100.23:8090/ui/crm-workspace/index.html
```

If you're enabling single sign-on in the adapter, add the `authType=saml` parameter to the **CTI Adapter URL**. For example:

```
https://198.51.100.23:8090/ui/crm-workspace/index.html&authType=saml
```

5. You might also want to adjust **Softphone Height** and **Softphone Width** to larger numbers (in pixels) so that Agent Desktop displays at an adequate size by default. You should leave the other options at their default values so Agent Desktop works correctly in Salesforce.

6. Click **Save**.
7. Click **Manage Call Center Users** and then click **Add users**.

## Genesys Gplus for Salesforce: Search for New Users

[All Call Centers](#) » [Genesys Gplus for Salesforce](#) » [Manage Users](#) » [Search for New Users](#)

Set the search criteria below and then click Search to find salesforce.com users who should be enabled as call center agents. Users already enabled as call center agents are excluded from the search results.

First Name	▼	equals	▼	Helen	AND
--None--	▼	--None--	▼		AND
--None--	▼	--None--	▼		AND
--None--	▼	--None--	▼		AND
--None--	▼	--None--	▼		AND

Filter By Additional Fields (Optional):

- You can use "or" filters by entering multiple items in the third column, separated by commas.
- For date fields, enter the value in following format: 23/03/2015
- For date/time fields, enter the value in following format: 23/03/2015 10:42 PM

[Find](#)

<a href="#">Add to Call Center</a> <a href="#">Cancel</a>					
<input type="checkbox"/>	Full Name	Alias	Username	Role	Profile
<input type="checkbox"/>	<a href="#">Jackson, Helen</a>	<a href="#">hjackson</a>	<a href="#">hjackson@genesysmail.com</a>		<a href="#">Standard User</a>

Your selected users are added to the list. You can remove a user on this page at any time.

9. To access Agent Desktop in Salesforce Console, click the **Workspace** button in the bottom right corner.

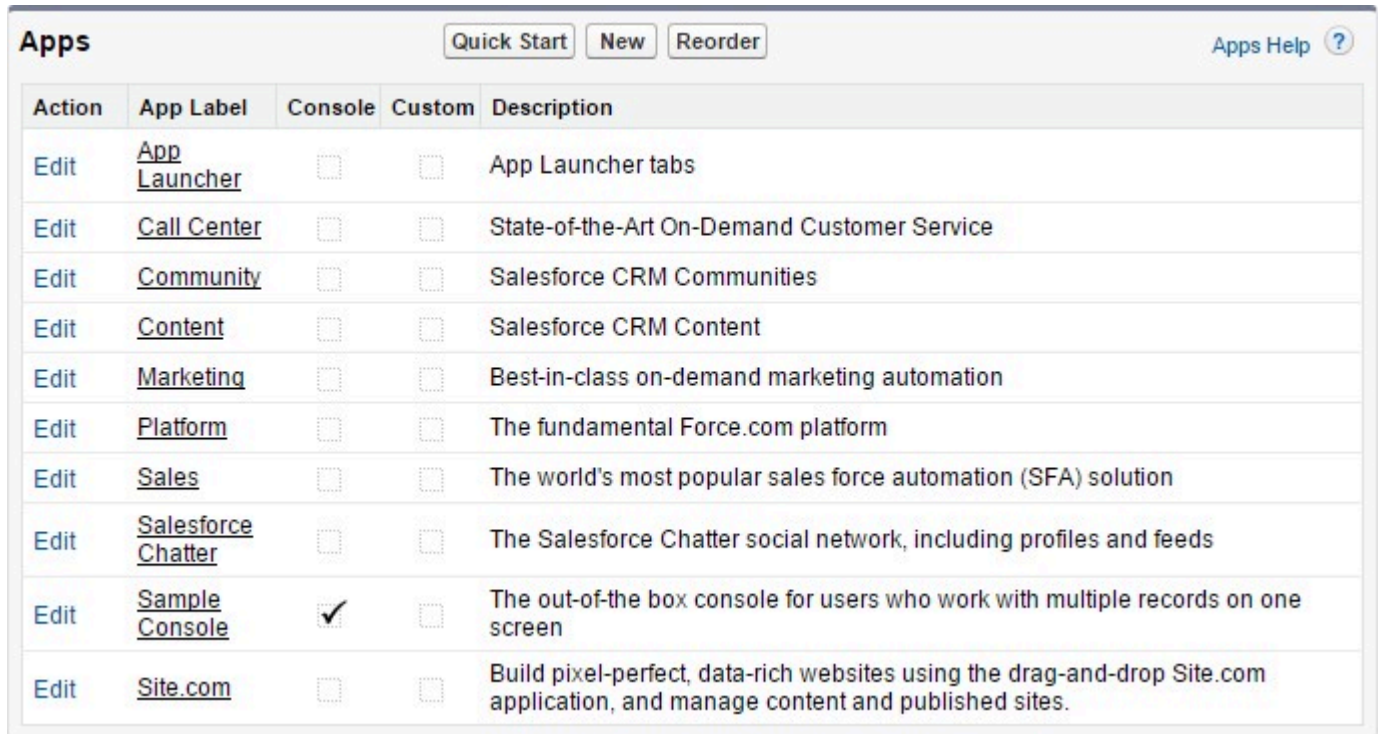

The screenshot shows the Salesforce Console interface. On the left, there is a sidebar with a 'Leads' section and a list of leads. The main area displays the 'Genesys • Workspace' overlay. This overlay includes a search bar, a navigation bar with tabs for 'My Channels', 'My Campaigns', 'My History', 'Dashboard', 'My Statistics', 'Contact Center Statistics', and 'SugarCRM'. The 'Dashboard' tab is selected. Below the navigation bar, there is a 'My Reports' section with a 'Call Activity' gauge showing a value of 0. To the right of the gauge, there are two buttons: 'Inbound' and 'Outbound'. Further right, there is a 'Contact Center' section with a dropdown menu showing '2223\_SIP\_Switch'. Below this, there are two timers: 'Current Max Wait Time' and 'Average Wait Time', both showing '00:00'. At the bottom right of the workspace, there is a 'Workspace' button.

Agent Desktop in Salesforce Console.

## Configuring the Whitelist Domain for your Salesforce Console

Complete this procedure to add the Genesys domain to the whitelist domains for your Salesforce Console. You need to complete this procedure to allow your users to access Agent Desktop in Salesforce Console in a separate browser window.

1. If you haven't already, login to Salesforce and go to **App Setup > Create > Apps** and select your console app — "Sample Console" in the image below:

The screenshot shows the Salesforce 'Apps' page. At the top, there are buttons for 'Quick Start', 'New', and 'Reorder', and an 'Apps Help' link with a question mark icon. Below these is a table with columns: Action, App Label, Console, Custom, and Description. The 'Sample Console' app is highlighted in blue, and its 'Console' checkbox is checked.

Action	App Label	Console	Custom	Description
<a href="#">Edit</a>	<a href="#">App Launcher</a>	<input type="checkbox"/>	<input type="checkbox"/>	App Launcher tabs
<a href="#">Edit</a>	<a href="#">Call Center</a>	<input type="checkbox"/>	<input type="checkbox"/>	State-of-the-Art On-Demand Customer Service
<a href="#">Edit</a>	<a href="#">Community</a>	<input type="checkbox"/>	<input type="checkbox"/>	Salesforce CRM Communities
<a href="#">Edit</a>	<a href="#">Content</a>	<input type="checkbox"/>	<input type="checkbox"/>	Salesforce CRM Content
<a href="#">Edit</a>	<a href="#">Marketing</a>	<input type="checkbox"/>	<input type="checkbox"/>	Best-in-class on-demand marketing automation
<a href="#">Edit</a>	<a href="#">Platform</a>	<input type="checkbox"/>	<input type="checkbox"/>	The fundamental Force.com platform
<a href="#">Edit</a>	<a href="#">Sales</a>	<input type="checkbox"/>	<input type="checkbox"/>	The world's most popular sales force automation (SFA) solution
<a href="#">Edit</a>	<a href="#">Salesforce Chatter</a>	<input type="checkbox"/>	<input type="checkbox"/>	The Salesforce Chatter social network, including profiles and feeds
<a href="#">Edit</a>	<a href="#">Sample Console</a>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	The out-of-the box console for users who work with multiple records on one screen
<a href="#">Edit</a>	<a href="#">Site.com</a>	<input type="checkbox"/>	<input type="checkbox"/>	Build pixel-perfect, data-rich websites using the drag-and-drop Site.com application, and manage content and published sites.

2. Click **Edit**. In **Whitelist Domains**, add the host and port provided by Genesys in Step 4 of [Configuring Salesforce for Agent Desktop](#). For example: 198.51.100.23:8090
3. Click **Save**.

## Configuring Screen Pops in Salesforce

When an agent receives an external call, Agent Desktop can initiate a screen pop that causes Salesforce to show an appropriate record for the caller. To set up this functionality in Salesforce, login and go to **Setup > Customize > Call Center > SoftPhone Layouts** to create a SoftPhone Layout. Check out the [Salesforce documentation](#) for details about configuration.

In general, there are a couple of things to consider when you set up a SoftPhone Layout for the Agent Desktop:

- Agent Desktop ignores the SoftPhone Layout settings that control call-related fields. Instead, the Agent

Desktop gets this information from Toast and Case Data configured in your Genesys environment.

- Make sure you configure the **Screen Pop Settings** in the "CTI 2.0 or Higher Settings" section. These settings control whether the screen pop opens in a new window, tab, or Visualforce page.
