Enterprise Manager

Enterprise Manager

Use Enterprise Manager to create one or more individual accounts in which messaging campaigns are run. With the enterprise account, you can apply global settings across all individual accounts at once.

You create individual accounts in the enterprise for each user in the enterprise. For example, a typical enterprise contains one or more individual accounts with Corporate plan privileges. If needed, the enterprise may also contain individual accounts with defined roles, such as Account Manager, Reporting or Call Center roles, in order to perform specific tasks.

What can I do in Enterprise Manager?

Before you get started, get to know the applications and what's involved in setting up and managing a campaign:

The screenshot displays the Genesys Enterprise Manager web interface. At the top, the Genesys logo and 'Enterprise Manager' text are visible, along with the date and time '3/27/17 5:29 AM America/Los_Angeles (GMT-7)' and the user 'Scott Admin'. Below the header, there are tabs for 'Accounts', 'Campaigns', 'Devices', and 'Enterprise', with 'Campaigns' currently selected. A 'Show All' link is present. The main content area shows a table of campaigns with columns for 'Account Information/ Campaign', 'Start Time/ End Time', and various status icons. The table lists two campaigns: 'OCS_PoD_2265 Account (3000043560)' and 'Scott_test-Today's Sub-Campaign'.
