# Genesys Engage cloud Reporting Guide

Table BOT\_INTENT

# Table BOT\_INTENT

## Description

**Introduced:** 8.5.015.19. Supported only in certain Genesys Engage cloud and on-premises deployments.

In partitioned databases, this table is not partitioned.

This dimension table enables Session Detail Record (SDR) bot session facts to be described based on attributes of the intent detected by the bot during the bot session, such as "Book ticket" or "Close account". Each row describes one intent, or what it is that the customer wants to do.

### Tip

To assist you in preparing supplementary documentation, click the following link to download a comma-separated text file containing information such as the data types and descriptions for all columns in this table: [Download a CSV file](#).

**Hint:** For easiest viewing, open the downloaded CSV file in Excel and adjust settings for column widths, text wrapping, and so on as desired. Depending on your browser and other system settings, you might need to save the file to your desktop first.

## Column List

### Legend

Column	Data Type	P	M	F	DV
ID	int	X	X		
CREATE_AUDIT_KEY	numeric(19)		X	X	
INTENT	nvarchar(255)		X		NO_VALUE

## Table BOT\_INTENT

---

### ID

The primary key of this table.

### CREATE\_AUDIT\_KEY

The surrogate key that is used to join to the CTL\_AUDIT\_LOG control table. The key specifies the lineage for data creation. This value can be useful for aggregation, enterprise application integration (EAI), and ETL tools — that is, applications that need to identify newly added data.

### INTENT

The customer's intent, which is a possible outcome of the bot session.

## Index List

CODE	U	C	Description
I_BOT_INTENT	X		Ensures that the combinations of values that are stored in the dimension table are unique.

## Index I\_BOT\_INTENT

Field	Sort	Comment
INTENT	Ascending
