Table LDR_LIST

Table LDR_LIST

Description

Introduced: 8.5.012.15

In partitioned databases, this table is not partitioned.

This dimension table allows CX Contact record facts to be described based on characteristics of contact lists. Each row describes one contact list.

Tip

To assist you in preparing supplementary documentation, click the following link to download a comma-separated text file containing information such as the data types and descriptions for all columns in this table: [Download a CSV file](#).

Hint: For easiest viewing, open the downloaded CSV file in Excel and adjust settings for column widths, text wrapping, and so on as desired. Depending on your browser and other system settings, you might need to save the file to your desktop first.

Table LDR_LIST

ID

The primary key of this table. This ID is referenced from other tables as LDR_LIST_KEY.

CREATE_AUDIT_KEY

The surrogate key that is used to join to the CTL_AUDIT_LOG control table. The key specifies the lineage for data creation. This value can be useful for aggregation, enterprise application integration (EAI), and ETL tools--that is, applications that need to identify newly added data.

LIST_NAME

The name of the contact list.

LIST_ID

DBID that Configuration Server assigned to the Calling List configuration object that represents the contact list.
