Contents

TCloseVoiceFile

Description

Closes the voice file specified by the parameter `file_handle` on behalf of the telephony object specified by the parameter dn, which earlier logged in to a mailbox using the function `TLoginMailBox()`.

Parameters

Name	Description
server	Local server handle to the T-Server in question.
dn	Directory number of the telephony object on whose behalf the file is closed.
file_handle	Handle of the file in question. Returned as a value of the `FileHandle` parameter in the `EventVoiceFileOpened` event.
reasons	A pointer to a data structure that provides additional information associated with this action.
extensions	A pointer to an additional data structure.

Return Values

Standard (standard-return-values.)
