TKVListPrint

Description

Sends the data contained in a data structure specified by the parameter `list` to the file specified by the parameter `f`.

Syntax

```
void TKVListPrint(  
    void *f,  
    TKVList *list,  
    char *header  
);
```

Parameters

For basic type information for each parameter, consult the Syntax section, above.

Name	Description
<code>f</code>	A pointer to the file where the data is requested to be printed.
<code>list</code>	A pointer to the data structure that is requested to be printed.
<code>header</code>	A pointer to the string containing additional text to be printed (date and time, source ID, comments, and so on). Set to <code>0</code> if no additional text should be printed.

Return Values

None
