TKVListStringValue

Description

Returns a pointer to the value (of character pointer type) of the parameter contained in a key-value pair specified by the parameter pair.

Syntax

```
char *TKVListStringValue(  
    TKVPair *pair  
);
```

Parameters

For basic type information for each parameter, consult the Syntax section, above.

Name	Description
pair	A pointer to the key-value pair that contains the value in question.

Return Values

A pointer to the value of the parameter contained in a key-value pair specified by the parameter pair.
