TSetReferenceID

Description

Sets the reference ID value to be used by T-Library for the next T-Library request.

Parameters

Name	Description
reference_id_for_next_req	A new reference identifier to be assigned to the next T-Library call.

Return Values

reference_id_for_next_req — Returned to the application if the request has been actually processed by T-Library.

< 0 — Error condition. Returned to the application if the request has not been processed by T-Library due to incorrect function statement.

Important

The return will never be a zero (0) value.

Comments

This function does not generate any messages to T-Server.
