TApplyTreatment

Description

On behalf of the telephony object specified by the parameter `dn`, applies a treatment specified by `treatment` to a call specified by `conn_id`.

Parameters

Name	Description
<code>server</code>	Local server handle to the T-Server in question.
<code>dn</code>	Directory number that specifies the telephony object to be treated.
<code>conn_id</code>	Connection identifier of the call to be treated.
<code>treatment</code>	Type of treatment being requested. Refer to the type <code>TTreatmentType</code> .
<code>parameters</code>	A pointer to a data structure that provides additional parameters associated with the treatment type. Refer to the type <code>TTreatmentType</code> .
<code>reasons</code>	A pointer to a data structure that provides additional information associated with this action.
<code>extensions</code>	A pointer to an additional data structure.

Return Values

Standard (See `standard-return-values`.)
