- **1 8.5.102.13**
  - **1.1 Helpful Links**
  - **1.2 What's New**
  - **1.3 Resolved Issues**
  - **1.4 Upgrade Notes**

## What's New

This release includes only resolved issues.

## Resolved Issues

This release contains the following resolved issues:

---

An issue that sometimes caused Configuration Server to stop working has been fixed.

The issue occurred during the following scenario:

1. A client sent multiple authentication requests, and Configuration Server deferred processing the requests because of previous pending requests from the client that were not yet completed.
2. The client then disconnected before Configuration Server started processing the previously deferred authentication requests.

(MFWK-25129)
