New in This Release

This is a hot fix for this product. This release does not contain new features or functionality.

Corrections and Modifications

This release also includes the following corrections or modifications:

When configured for active-active or active-standby high availability, the Resource Manager (RM) no longer terminates in a race condition when these events occur at the same time:

- a CANCEL message from SIP Server.
- responses for the INVITE from resources that are managed by RM.
